

DISCLOSURE
REPORT | 2020

*Investec Bank Limited group
Basel Pillar III
Quarterly disclosure report*

Scope and framework

This document encompasses Investec Bank Limited group, including both regulated and unregulated entities, which is equivalent to the scope of the consolidated banking group as defined by the South African Reserve Bank for consolidated regulatory reporting purposes.

In terms of Regulation 43(1) of the Regulations, Investec is required to disclose in its annual financial statements and other disclosures to the public, reliable, relevant and timely qualitative and quantitative information that enable users of that information, among other things, to make an accurate assessment of the group's financial condition, including, but not limited to, its capital adequacy position, and its liquidity position, financial performance, leverage ratio, ownership, governance, business activities, risk profile and risk-management practices.

In this regard the Basel Committee on Banking Supervision (BCBS) issued a revised Pillar III framework in January 2015 and the consolidated and enhanced framework in March 2017 as well as the updated framework on Pillar III disclosure requirements in December 2018. The Prudential Authority (PA) removed all disclosure requirements from the Regulations and previous Banks Act directives related to disclosure requirements through Directive 1/2019 (the Directive) in order to create a single point of reference for the disclosure requirements to ensure the internationally agreed Pillar III framework is fully implemented in South Africa. The provisions of this directive are not related to any disclosure requirements that may be specified by the Johannesburg Stock Exchange Limited (JSE) in respect of the Stock Exchange News Service (SENS) from time to time.

In line with the Directive, retrospective disclosures and templates that require the disclosure of data points for current and previous reporting periods, are not required when metrics for new standards are reported for the first time. The Pillar III reports are published on Investec's Investor Relations website in line with the required frequency of disclosures per the Directive and is done for both the Investec Bank and Investec Limited group.

Assurance and policy

In accordance with the Regulations, the Board of Directors and senior management are responsible for establishing and maintaining an effective internal control structure in respect of Pillar III disclosures. In this regard, the Board and senior management have ensured that appropriate review and sign-off of the relevant Pillar III disclosures have taken place, as outlined in the Pillar 3 disclosure policy, prior to its release on the Investor Relations website.

Quantitative and qualitative disclosures

The Pillar III disclosures are published in line with disclosure dates that are commensurate with the Financial Reporting disclosure timelines and is subject to the same governance framework as tabled in the Investec Market Communication and Disclosure Policy. The following regulatory risk measurement approaches are applied by Investec for purposes of capital adequacy:

- Credit risk (including securitisation risk): Combination of the Internal ratings-based approach (IRB) and the Standardised approach (TSA)
- Market risk: A combination of the standardised (TSA) and internal model method (IMM) approaches
- Operational risk: The standardised approach (TSA)
- Equity risk in the banking book: The Market-based approach – Simple Risk Weight Method (MSRM)
- Counterparty credit risk: The Current Exposure Method (CEM)

In this regard, all tables and disclosures may not be relevant to Investec and are excluded from this Pillar III report.

20 NSFR ratio	112.2	113.9	118.5	117.3	114.3

KM1: KEY METRICS

(continued)

Capital information includes unappropriated profits. If unappropriated profits are excluded from capital information, Investec Bank Limited group common equity tier 1 ratio would be 66bps lower and total capital adequacy ratio would be 65bps lower.

Investec have always held capital in excess of regulatory requirements and continue to remain well capitalised. Accordingly, the Investec group targets a minimum CET1 capital ratio of above 10%, a tier 1 capital ratio of above 11% and a total capital ratio target in the range of 14% to 17%.

Investec targets a leverage ratio above 6%.

Notes:

N1: Banks are required to refrain from disclosing to the public their Pillar 2B requirement that is based on a combination of various qualitative and quantitative factors that are not directly comparable across banks. Banks are required to publicly disclose their D-SIB capital add-on as part of their composition of regulatory capital disclosure from September 2020.

N2: Refer to the LIQ1: Liquidity Coverage ratio template and commentary on pages 9 to 10 of this report.

N3: The key difference between the 'reported' basis and the 'fully loaded' basis primarily relates to capital instruments that previously qualified as regular capital, but do not fully qualify under South African Prudential Authority regulations. These instruments continue to be registered on a reducing basis in the 'reported' figures until 2022. The fully loaded ratio and capital amounts throughout out the KM1 template assumes full adoption of IFRS 9 and is based on Basel III capital requirements as fully phased in by 2022.

OV1: OVERVIEW OF RWA

The following section provide an overview of total RWA forming the denominator of the risk-based under Pillar 1 capital requirements. Further breakdowns of RWA are presented in subsequent parts.

R'million			a	b	c
			Risk-weighted assets (IRB)		Minimum capital requirements
			31 December 2020	30 September 2020	31 December 2020
1	Credit risk (excluding counterparty credit risk) (CCR)	N1	245 630	248 118	27 018
2	Of which standardised approach (SA)		79 695	83 010	8 766
3	Of which foundation internal rating-based (F-IRB) approach		145 803	144 709	16 038
4	Of which supervisory slotting approach		5 337	5 570	587
5	Of which internal rating-based (A-IRB) approach		14 795	14 829	1 627
6	Counterparty credit risk	N2	9 029	8 449	993

26	Floor adjustment	N6	-	-	-
27	Total (1+6+10+11+12+13+14+15+16+20+23+ 24+25+26)		320 123	320 969	35 213

The commentary for the movement in risk-weighted assets (RWA) below is based on comparisons between 30 September 2020 and 31 December 2020.

The minimum capital requirements in column (c) are based on the SARB minimum capital requirements for Investec of 11.0%, however excludes Investec's Pillar 2B add-on in line with the Banks Act Directive 4 of 2020.

Risk-weighted assets are calculated according to the Basel framework, including the 1.06 scaling factor for credit and equity exposures subject to the internal ratings-based approach (IRB), and as reported in accordance with the subsequent parts of this standard. Where the regulatory framework does not refer to RWA but directly to capital charges (e.g. for market risk and operational risk), RWA is derived by multiplying the capital charge by 12.5.

(continued)

Movement in risk-weighted asset

Total risk-weighted assets decreased by R846 million over the period, with the reasons identified in the categories below.

Notes:

N1: Credit risk weighted assets decreased by R2.5 billion. A flow statement, explaining the variations in the credit risk-weighted assets determined under an IRB approach, is provided in table CR8.

N2: The group applied the current exposure method (CEM) to calculate required capital for over the counter (OTC) exposures and the standardised approach (TSA) for security financing transactions (SFT). Counterparty credit risk RWA is the sum of OTC, SFT, regulatory Credit Valuation Adjustment (CVA), exposures to central counterparties (CCP's) and any default fund contributions, of which total remained fairly flat over the reporting period. Our exposure to counterparty credit risk is marginal at 4.7% of total RWA.

N3: Equity risk remained fairly flat over the reporting period. The risk weight attributable to equity investments is relatively high, with listed equities attracting an effective 318% and unlisted equities 424%. The impact of this is proportionately much larger movement in RWA than the associated balance sheet equity value.

N4: Operational risk is calculated using the standardised approach and is driven by the levels of income over a three-year average period, applying specific factors applicable to the nature of the business generating the income.

N5: The risk-weighted assets in this line item relate to investments in significant financial entities and deferred tax assets below the 10% of CET1 threshold.

N6: The Bank did not have any additional add-on to risk weighted assets as a result of the capital floor calculation specified in Directive 3 of 2013.

N7: Market risk RWAs are calculated using the Value at Risk (VaR) approach.

LR1: SUMMARY COMPARISON OF ACCOUNTING ASSETS VS LEVERAGE RATIO EXPOSURE MEASURE (JANUARY 2014 STANDARD)

The purpose of the LR1 table below is to reconcile the total assets in the published financial statements to the leverage ratio exposure measure.

	a	a
R'million	31 December 2020	30 September 2020
1 Total consolidated assets as per published financial statements ^	522 586	531 933
2 Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-	-
3 Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-	-
4 Adjustments for derivative financial instruments	(15 831)	(9 639)
5 Adjustments for securities financing transactions (i.e. repos and similar secured lending)	(2 151)	2 195
6 Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)	44 763	44 415
7 Other adjustments	(5 114)	(5 069)
8 Leverage ratio exposure measure	544 253	563 835

^ - Adjusted for impairments.

LR2: LEVERAGE RATIO COMMON DISCLOSURE TEMPLATE

The purpose of the LR2 table below is to provide a detailed breakdown of the components of the leverage ratio denominator.

	a	b
R'million	31 December 2020	30 September 2020
On-balance sheet exposures		
1 On-balance sheet exposures (excluding derivatives and securities financing transactions (SFTs), but including collateral)	463 901	472 591
2 (Asset amounts deducted in determining Basel III Tier 1 capital)	(5 114)	(5 069)
3 Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of rows 1 and 2)	458 787	467 522
Derivative exposures		
4 Replacement cost associated with all derivatives transactions (where applicable net of eligible cash variation margin and/or with bilateral netting)	11 651	10 822
5 Add-on amounts for PFE associated with all derivatives transactions	4 433	4 548
6 Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	-	-
7 (Deductions of receivables assets for cash variation margin provided in derivatives transactions)	-	-
8 (Exempted CCP leg of client-cleared trade exposures)	(3 691)	(3 605)
9 Adjusted effective notional amount of written credit derivatives	-	-
10 (Adjusted effective notional offsets and add-on deductions for written credit derivatives)	-	-
11 Total derivative exposures (sum of rows 4 to 10)	12 393	11 765
Securities financing transaction exposures		
12 Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	27 785	35 411
13 (Netted amounts of cash payables and cash receivables of gross SFT assets)	-	-
14 CCR exposure for SFT assets	525	4 721
15 Agent transaction exposures	-	-
16 Total securities financing transaction exposures (sum of rows 12 to 15)	28 310	40 132
Other off-balance sheet exposures		
17 Off-balance sheet exposure at gross notional amount	97 437	100 040
18 (Adjustments for conversion to credit equivalent amounts)	(52 674)	(55 624)
19 Off-balance sheet items (sum of rows 17 and 18)	44 763	44 416
Capital and total exposures		
20 Tier 1 capital	43 149	42 037
21 Total exposures (sum of rows 3, 11, 16 and 19)	544 253	563 835
Leverage ratio		
22 Basel III leverage ratio	7.9	7.5

Investec Bank Limited group's current leverage ratio is 7.9% ahead of the minimum 6% target level. We maintain an Investec group target common equity tier 1 ratio in excess of 10% which is currently considered appropriate for businesses given our sound leverage ratios.

LIQ1: LIQUIDITY COVERAGE RATIO (LCR)

The purpose of the LIQ1 table below is to present the breakdown of a bank's cash outflows and cash inflows, as well as its available high-quality liquid assets (HQLA), as measured and defined according to the LCR standard.

The objective of the Liquidity Coverage ratio (LCR) is to promote the short-term resilience of the liquidity risk profile of banks by ensuring that they have sufficient high-quality liquid assets to survive a significant stress scenario lasting 30 calendar days.

	a	b
31 December 2020 R'million	Total unweighted value (average)	Total weighted value (average)
High-quality liquid assets		
1 Total HQLA		87 717
Cash outflows		
2 Retail deposits and deposits from small business customers, of which:	88 063	8 806
3 Stable deposits	-	-
4 Less stable deposits	88 063	8 806
5 Unsecured wholesale funding, of which:	118 762	87 740
6 Operational deposits (all counterparties) and deposits in networks of cooperative banks	-	-
7 Non-operational deposits (all counterparties)	118 264	87 242
8 Unsecured debt	498	498
9 Secured wholesale funding		127
10 Additional requirements, of which:	89 858	18 813
11 Outflows related to derivative exposures and other collateral requirements	28 683	12 585
12 Outflows related to loss of funding on debt products	-	-
13 Credit and liquidity facilities	61 175	6 228
14 Other contractual funding obligations	165	165
15 Other contingent funding obligations	97 133	5 648
16 TOTAL CASH OUTFLOWS		121 300
Cash inflows		
17 Secured lending (eg reverse repos)	25 879	12 258
18 Inflows from fully performing exposures	53 625	48 887
19 Other cash inflows	4 278	4 126
20 TOTAL CASH INFLOWS	83 782	65 271
	Total adjusted value	
21 Total HQLA		87 717
22 Total net cash outflows		56 030
23 Liquidity Coverage Ratio (%)		157.6

The objective of the Liquidity Coverage ratio (LCR) is to promote the short-term resilience of the liquidity risk profile of banks by ensuring that they have sufficient high-quality liquid assets to survive a significant stress scenario lasting 30 calendar days.

The values in the table are calculated as the simple average of the 92 calendar daily values over the period 1 October 2020 to 31 December 2020 for Investec Bank Limited (IBL) bank solo. Investec Bank Limited consolidated group values use daily values for IBL bank solo, while those for other group entities use the average of October, November and December 2020 month-end values.

The minimum LCR requirement, while normally 100%, was lowered to 80% as a temporary measure during the COVID-19 pandemic. This applies for both IBL bank solo and IBL consolidated group. The Bank of Mauritius requires banks to comply with a combined-currency LCR minimum of 100% from 1 January 2020.

LIQ1: LIQUIDITY COVERAGE RATIO (LCR)

(continued)

	a	b
30 September 2020 R'million	Total unweighted value (average)	Total weighted value (average)
High-quality liquid assets		
1 Total HQLA		88 808
Cash outflows		
2 Retail deposits and deposits from small business customers, of which:	88 416	8 842
3 Stable deposits	-	-
4 Less stable deposits	88 416	8 842
5 Unsecured wholesale funding, of which:	116 167	85 159
6 Operational deposits (all counterparties) and deposits in networks of cooperative banks	-	-
7 Non-operational deposits (all counterparties)	115 213	84 205
8 Unsecured debt	954	954
9 Secured wholesale funding		193
10 Additional requirements, of which:	89 981	20 847
11 Outflows related to derivative exposures and other collateral requirements	31 939	15 154
12 Outflows related to loss of funding on debt products	-	-
13 Credit and liquidity facilities	58 042	5 693
14 Other contractual funding obligations	369	369
15 Other contingent funding obligations	98 307	4 906
16 TOTAL CASH OUTFLOWS		120 316
Cash inflows		
17 Secured lending (eg reverse repos)	29 707	13 650
18 Inflows from fully performing exposures	52 825	47 508
19 Other cash inflows	5 070	4 898
20 TOTAL CASH INFLOWS	87 602	66 056
	Total adjusted value	
21 Total HQLA		88 808
22 Total net cash outflows		54 260
23 Liquidity Coverage Ratio (%)		164.1

The main drivers of the LCR results and the evolution of the contribution of inputs to the LCR's calculation over time:

- The average LCR decreased by 6.5%. We remain fully compliant with regulatory requirements, and above the target set by the Board.
- The structure and nature of deposits inside the 30 day window is the key driver of both the level and the volatility of the LCR. This weighted outflow is determined by the customer type of liabilities falling into the 30 day contractual bucket. In turn these deposit characteristics determine the targeted level of high quality liquid assets (HQLA) required to be held as a counterbalance to the modelled stressed outflows.
- Only banking and / or deposit-taking entities are included, and the group data represents an aggregation of the relevant individual net cash outflows and the individual HQLA portfolios. Our two banks, Investec Bank Limited (IBL) and Investec Bank (Mauritius) Limited (IBM), contributed over 99% of the group's combined HQLA and stressed cash inflows and outflows. With the ability to transfer cash surpluses between group entities, the consolidated group LCR is higher than IBL solo's.

The composition of HQLA:

- The HQLA comprises primarily South African sovereign and central bank Rand-denominated securities and debt instruments, all of which are eligible for SARB repo.
- On average, Level 2 assets contributed 4% of total HQLA. As of 1 December 2017, we no longer make use of the SARB's committed liquidity facility (CLF).
- Some foreign denominated government securities are included in the HQLA, subject to regulatory limitations.

CR8: RWA FLOW STATEMENTS OF CREDIT RISK EXPOSURES UNDER IRB

The purpose of this table is to present a flow statement explaining variations in the credit risk-weighted assets (RWA) determined under an IRB approach.

	a	a	a	a	a
RWA amounts R'million	31 December 2020	30 September 2020	30 June 2020	31 March 2020	31 December 2019
1 RWA as at end of previous reporting period	165 108	156 673	155 280	156 769	150 524
2 Asset size	(4 054)	(1 186)	591	(3 409)	(1 432)
3 Asset quality	758	6 289	1 568	(3 631)	2 583
4 Model updates	-	-	-	-	-
5 Methodology and policy	-	-	-	-	-
6 Acquisitions and disposals	6 373	4 775	(948)	3 134	4 613
7 Foreign exchange movements	(2 250)	(1 443)	182	2 417	481
8 Other	-	-	-	-	-
9 RWA as at end of reporting period	165 935	165 108	156 673	155 280	156 769

Investec Bank Limited adopted the Foundation Internal Ratings Based Approach (FIRB) to calculate Credit risk from 1 April 2019. Investec Bank Limited's application for conversion to Advanced Internal Ratings Based Approach (AIRB) remains under review by the South African Prudential Authority. Approval has been granted for Investec Bank Limited to commence with its six month parallel run for certain AIRB models. Full conversion to AIRB is expected to result in a circa 2% uplift to the CET1 ratio.

The table above excludes risk weighted assets related to counterparty credit risk exposures.

MR3: IMA VALUES FOR TRADING PORTFOLIOS

The table below displays the values (maximum, minimum, average and period ending for the reporting period) resulting from the different types of models used for computing the regulatory capital charge at the group level, before any additional capital charge is applied by the jurisdiction.
