A summary of IBP's ratings

Moody's

On 1 February 2019, Moody's upgraded IBP's long-term deposit ratings to A1 (stable outlook) from A2 (positive outlook) and its baseline credit assessment (BCA) to baa1 from baa2.

The upgrades were the reflection of:

IBP's successful de-risking of the balance sheet as its legacy assets continue to run-off, the shift in composition of its revenues towards lower lending risks and more stable revenue streams, primarily in the lower risk wealth management segment and IBP's sound capitalisation and strong liquidity buffers.

Fitch

On 6 September 2017, Fitch upgraded IBP's Long-Term Issuer Default Rating (IDR) to BBB+ from BBB and its Viability Rating (VR) to bbb+ from bbb.

The upgrades were a reflection of:

The greater stability of IBP's business model, the progress IBP has made in running down its legacy assets and reducing the concentration of its loan book towards property lending, an increase in capital-light business and hence more stable earnings, while simultaneously maintaining sound capitalisation, strong liquidity and an adequate funding structure.

IBP rating history

A detailed history of IBP's ratings is shown alongside. During the financial crisis IBP was downgraded two notches by Fitch first from BBB+ to BBB in November 2008 and then to BBB- at the end of November 2011. Similarly, IBP was downgraded by Moody's from A3 to Baa1 in December 2007 and then to Baa3 in March 2009.

We believe that our operating fundamentals remained sound over that time and that these downgrades were largely reflective of a very negative view taken by the rating agencies on the operating environment and economic conditions during that time.

Rating definitions: Short-term ratings should be used for investments less than a one year time horizon and long-term ratings for periods greater than a year. Note: Comparative ratings have been sourced from the Moody's and Fitch websites as at 30 January 2019 and may be subject to changes for which we cannot be held accountable. It is advisable to discuss the ratings of the various companies with the companies themselves as this information merely reflects our interpretation thereof.

An overview of IBP's operating fundamentals

IBP has maintained consistently sound operating fundamentals through varying economic cycles as evidenced below:

	Six months to 30 Sept 2018	31 Mar 2018	31 Mar 2017	31 Mar 2016	31 Mar 2015	31 Mar 2014	31 Mar 2013	% change Mar 2018 vs 2013	% change Mar 2018 vs 2009
Operating profit before non-operating items, taxation, expected credit loss impairment charges and after non-controlling interests (£'mn)	128.6	242.4	236.0	230.6	203.3	205.9	197.3	23%	69%

Loans and advances to customers as a % of customer deposits	78.7%	80.7%	76.2%	70.5%	66.5%	69.9%	68.2%		

[^] The decrease in total assets, core loans and deposits between March 2015 and March 2014 is as a result of the sale of Investec Bank (Australia) Limited and certain other group assets during the financial year ended 31 March 2015.

[#] Expected credit loss (ECL) impairment charges on gross core loans and advances to customers as a % of average gross core loans and advances to customers subject to ECL.

^{*} Annualised.

Asset quality and exposures

0.42%
(credit loss ratio)

The bulk of IBP's credit and counterparty risk arises through its private client and corporate client activities. The bank lends to high net worth and high income individuals, mid to large sized corporates, public sector bodies and institutions. The majority of IBP's credit and counterparty exposures reside within its principal operating geography, namely the UK.

The total ECL impairment charges amounted to £10.4 million for the six months ended 30 September 2018, a substantial reduction from £37.6 million in the prior period, primarily reflecting a reduction in legacy impairment. The annualised credit loss ratio amounted to 0.42% at 30 September 2018 (31 March 2018: 1.14%).

Core loans and asset quality

Stage 3 exposure net of ECL at 30 September 2018 amounted to £277 million (1 April 2018: £372 million) largely driven by a reduction in legacy exposures. Stage 3 exposure net of ECL as a percentage of net core loans and advances to customers subject to ECL as at 30 September 2018 amounted to 3.0% (1 April 2018: 4.3%).

Liquidity and funding

£6.3bn
(cash and near cash)

IBP has a liquidity management philosophy that has been in place for many years. The bank continues to focus on maintaining a high level of readily available high-quality liquid assets targeting a minimum cash to customer deposit ratio of 25%. At 30 September 2018, the bank had £6.3 billion of cash and near cash to support its activities, representing approximately 49.4% of customer deposits.

Furthermore, the bank maintains an appropriate mix of term funding, placing a low reliance on interbank wholesale funding to fund core lending asset growth. IBP targets a diversified funding base, avoiding undue concentrations by investor types, maturity and market source, instrument and currency. Customer deposits amounted to £12.7 billion as at 30 September 2018 (31 March 2018: £12.0 billion). The bank's loans and advances to customers as a percentage of customer deposits was 78.7% at 30 September 2018 (31 March 2018: 80.7%).

Cash and near cash trend

Deposit guarantees

In terms of the Financial Services Compensation Scheme, the UK government guarantees a maximum deposit of £85 000 per individual per institution.

Investec Bank (Channel Islands) Limited is a participant in both the Guernsey and Jersey Banking Deposit Compensation Schemes. These schemes offer protection for 'qualifying deposits/eligible deposits' up to £50 000, subject to certain limitations. The maximum total amount of compensation is capped at £100 million in any five-year period.

Further details are available on request on alternatively on the Guernsey Scheme's website: www.dcs.gg <<http://www.dcs.gg/>> or on the Jersey States website which will also highlight the banking groups covered.

Capital adequacy

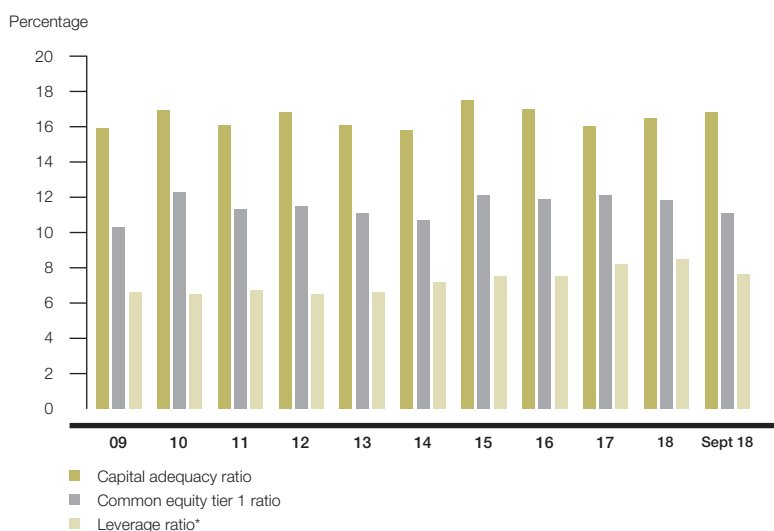

16.8%

IBP holds capital in excess of regulatory requirements and intends to perpetuate this philosophy and ensure that it remains well capitalised. The bank has never required shareholder or government support. At 30 September 2018, the capital adequacy ratio of IBP was 16.8% and the common equity tier 1 ratio was 11.1%.

The bank's anticipated 'fully loaded' Basel III common equity tier 1 ratio and leverage ratio are 10.6% and 7.3% respectively (where 'fully loaded' is based on Basel III requirements as fully phased in by 2022). These disclosures incorporate the deduction of foreseeable charges and dividends as required by the regulations. Excluding this deduction, the common equity tier 1 ratio would be 13bps higher.

We are on the Standardised Approach in terms of Basel, thus our risk-weighted assets represent a large portion of our total assets.

Basel capital ratios – standardised approach

* The leverage ratio has only been disclosed since 2014. Historic information has been estimated.

Gearing

10.2x

IBP is not a highly geared bank. A number of banks that have come into difficulty in the past have been in excess of 40 times geared. IBP's comparative ratio would be 10.2 times.

Gearing ratio
