Investec Bank (Channel Islands) Limited is a wholly owned subsidiary of Investec Overseas Investments Limited which is incorporated in Great Britain, and registered in England and Wales. The ultimate holding company is Investec plc.

Copies of the full financial statements of Investec Bank (Channel Islands) Limited are available on request.

# Chairman's statement

I am delighted to present the results of Investec Bank (Channel Islands) Limited for the year ended 31 March 2009. Despite the continuing uncertain and difficult economic climate and the challenging operating conditions in the financial services sector, we are able to report a significant profit and a creditable performance compared with the previous year.

Profit after tax amounted to £16.6 million (2008: £20.9 million). The balance sheet footings grew by 14% this year and now stand at £2.04 billion (2008: £1.79 billion).

Our client deposit book grew by 13% to £1.888 billion (2008: £1.670 billion) on the back of a combination of new clients and further funds from existing relationships. Our loan book grew by 18% to £605.5 million (2008: £513.4 million). Our staff continue to develop distinctive offerings for our local and international clients. Distinctively, in these times, we have kept loan impairments to a minimum through diligent management of our loan book.

Pillar 1 of the Basel II Regulations have been implemented and all the relevant changes to our systems and business processes have been made. During the year we have successfully launched online payments for our Vision system to our intermediaries which has been well received by them.

Our Jersey branch, which opened in May 2007, continues to grow with the client deposit book growing by 152% during the year. Our team in Jersey continue to establish relationships across the fiduciary sector and with corporate clients.

During the year under review, we received recognition in the wider business community by winning the Guernsey Large Business of the Year Award 2008. This is a credit to our management and staff whose entrepreneurial flair and consistently high performance on behalf of our clients is recognised by this award.

On behalf of the shareholders, I thank the Board and the staff in Guernsey and Jersey for their tireless efforts which have produced such commendable results during uncertain economic times. As always, our results also reflect the quality and loyalty of our clients. We value each client and thank them for their support for Investec. We feel confident that with the quality of our clients and staff we can look forward to another successful year.

Alan Tapnack  
Chairman

# Independent Auditor's report

To the Directors of Investec Bank (Channel Islands) Limited

We have examined the abridged financial statements on pages 5 to 17 together with the audited financial statements of Investec Bank (Channel Islands) Limited for the year ended 31 March 2009. The scope of our work for the purpose of this report was limited to confirming whether the abridged financial statements have been properly prepared from the audited financial statements and have been drawn up in a manner authorised by the Guernsey Financial Services Commission.

In our opinion the abridged financial statements have been extracted from the audited financial statements and have been drawn up in accordance with the provisions of The Banking Supervision (Bailiwick of Guernsey) Law, 1994 in a manner authorised by the Guernsey Financial Services Commission.

On 2 July 2009 we reported, as auditors of Investec Bank (Channel Islands) Limited, to the members on the audited financial statements as follows: "We have audited the Company's financial statements for the year ended 31 March 2009 which comprise the Profit and Loss Account, the Balance Sheet and the related notes 1 to 34. These financial statements have been prepared on the basis of the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 262 of The Companies (Guernsey) Law, 2008. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

## Respective responsibilities of directors and auditors

As described in the Statement of Directors' Responsibilities, the Company's Directors are responsible for the preparation of the financial statements in accordance with applicable Guernsey law.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with The Companies (Guernsey) Law, 2008, The Banking Supervision (Bailiwick of Guernsey) Law, 1994 and The Protection of Investors (Bailiwick of Guernsey) Law, 1987. We also report to you if, in our opinion, the Report of the Directors is not consistent with the financial statements, if the Company has not kept proper accounting records, or if we have not received all the information and explanations we require for our audit.

We read the Report of the Directors and consider the implications for our report if we become aware of any apparent misstatements within it.

## Basis of audit opinion

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

## Opinion

In our opinion the financial statements give a true and fair view, in accordance with United Kingdom Accounting Standards, of the state of the Company's affairs as at 31 March 2009 and of its profit for the year then ended; and have been properly prepared in accordance with The Companies (Guernsey) Law, 2008, The Banking Supervision (Bailiwick of Guernsey) Law, 1994 and The Protection of Investors (Bailiwick of Guernsey) Law) 1987.

Furthermore, we have examined the Statement of Financial Resources set out on page 32 and in our opinion the financial resources requirement specified in Rule 4.02 of the Collective Investments Schemes (Designated Persons) Rules 1988 has been satisfied."

# Independent Auditor's report

The statement of Directors' responsibilities referred to in our audit report of the full financial statements reproduced above, was as follows:

## Directors' responsibilities in respect of the financial statements

The Directors are required by The Companies (Guernsey) Law, 2008, to prepare financial statements for each financial period, which give a true and fair view of the state of affairs of the Company as at the end of the financial period. In preparing those financial statements the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The Directors confirm that they have complied with the above requirements in preparing the financial statements. They also confirm that so far as they are aware, there is no material relevant audit information of which the Company's auditors are unaware and they have taken all the steps they ought to have taken as Directors to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

The Directors are responsible for keeping proper accounting records, which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with The Banking Supervision (Bailiwick of Guernsey) Law, 1994 and The Companies (Guernsey) Law, 2008. The Directors also have additional responsibilities as the Company is a Designated Person under the Protection of Investors (Bailiwick of Guernsey) Law 1987, and The Collective Investment Schemes (Designated Persons) Rules 1988. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

M. Mirghavameddin

S. D. Henry

The notes on pages 7 to 17 form part of these abridged financial statements.

# Notes to the abridged financial statements at 31 March 2009

## 1. Principal accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the Financial Statements of the Company:

### Basis of preparation

The abridged financial statements are prepared under the historical cost convention, as modified for the revaluation of certain investments and in accordance with applicable Guernsey law and United Kingdom accounting standards.

### Foreign currency transactions

The presentation and functional currency of the bank is sterling.

Transactions denominated in foreign currencies are translated into sterling at the rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the rates ruling at that date. Foreign exchange gains and losses are included in the profit and loss account.

Forward foreign exchange contracts are valued using appropriate valuation techniques applying a comparison to similar instruments for which market observable prices exist. Gains and losses are recognised in the profit and loss account.

### Debt securities

Debt securities held to maturity are included in the balance sheet at amortised cost. Gains and losses on sale are recognised upon realisation.

### Investment in subsidiary

Subsidiaries are held for the long term and are included at cost, subject to regular impairment review.

Impairment losses are recognised as an expense in the profit and loss account in the period in which they are identified.

Realised gains and losses on the sale of investments are reflected in the profit and loss account.

### Property, plant, equipment and intangible assets

Property and equipment is recorded at cost less accumulated depreciation and impairments.

Depreciation and amortisation is provided on the depreciable amount of each component on a straight-line basis over the anticipated useful life of the asset. The depreciable amount related to each asset is determined as the difference between cost and the residual value of the asset. The residual value is the estimated amount, net of disposal costs, that the bank would currently obtain from the disposal of an asset of similar age and condition as expected at the end of the useful life of the asset.

The annual depreciation and amortisation rates for each class of asset is as follows:

	%
Leasehold improvements	Over the Term of the lease
Office equipment – furniture and fittings	20%-33%
Office equipment – general	15%-20%
Office equipment – computer equipment	33%
Intangible Assets	33%
Freehold property	Nil (market value is deemed to be greater than cost)

### Impairment of non financial assets

The Company assesses at each reporting date or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. If any such indication exists, the Company makes an estimate of the asset's recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

### Share-based payments

#### Equity-settled transactions

The Company operates share option and share purchase schemes for employees, on an equity settled basis. The purpose of the staff share schemes is to promote an 'esprit de corps' within the organisation, create an awareness of Investec's performance and provide an incentive to maximise individual and group performance by allowing staff to share in the risks and rewards of the Company.

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted and is recognised as an expense over the vesting period, which ends on the date on which the relevant employees become fully entitled to the award. Fair value is determined by an external valuer using an appropriate pricing model. In valuing equity-settled transactions, no account is taken of any vesting conditions, other than conditions linked to the price of the shares of the Company (market conditions).

# Notes to the abridged financial statements at 31 March 2009

No expense is recognised for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition, which are treated as vesting irrespective of whether or not the market condition is satisfied, provided that all other performance conditions are satisfied.

At each balance sheet date before vesting, the cumulative expense is calculated, representing the extent to which the vesting period has expired and management's best estimate of the number of equity instruments that will ultimately vest or in the case of an instrument subject to a market conditions, be treated as vesting as described above. The movement in cumulative expense since the previous balance sheet date is recognised in the income statement, with a corresponding entry in equity.

Where the terms of an equity-settled award are modified or a new award is designated as replacing a cancelled or settled award, the cost based on the original award terms continues to be recognised over the original vesting period. In addition, an expense is recognised over the remainder of the new vesting period for the incremental fair value of any modification, based on the difference between the fair value of the original award and the fair value of the modified award, both as measured on the date of the modification. No reduction is recognised if this difference is negative.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any cost not yet recognised in the profit and loss account for the award is expensed immediately. Any compensation paid up to the fair value of the award at the cancellation or settlement date is deducted from equity, with any excess over fair value being treated as an expense in the profit and loss account.

For awards granted before 7 November 2002, the group recognises only the intrinsic value or cost of these potential awards as an expense. This is accrued over the performance period of each plan based on the intrinsic value of the equity settled awards.

## Revenue recognition

Interest income is recognised in the profit and loss account using the effective interest method. Fees charged on lending transactions are included in the effective yield calculation to the extent that they form an integral part of the effective interest yield, but exclude those fees earned for a separately identifiable significant act, which are recognised upon completion of the act.

The effective interest yield calculation is based on the estimated life of the underlying instrument. Where this is not readily available, the contractual life is used.

Commissions and fees include fees earned from foreign exchange, credit related fees, bank charges and custodian services. All such commissions and fees are recognised as revenue when the related services are performed.

## Financial instruments

### *Financial assets and liabilities held at fair value through profit or loss*

Financial instruments designated as held at fair value through profit or loss include all instruments classified as held for trading and those instruments designated as fair value through profit or loss. Financial instruments are classified as trading when they are held with the intention of short term disposal, held with the intention of generating short-term profits, or are derivatives which are not designated as part of effective hedges. Financial instruments designated as held at fair value through profit or loss are designated as such on initial recognition of the instrument and remain in this classification until derecognition.

### *Held-to-maturity assets*

Held to maturity assets are non-derivative financial instruments with fixed or determinable payments and maturity dates. Financial instruments that the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity and are measured at amortised cost using the effective interest rate, less impairment losses.

### *Due from banks and loans and advances to customers*

'Due from banks' and 'Loans and advances to customers' are financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market. They are not entered into with the intention of short-term resale and are not classified as 'Financial assets held for trading', designated as 'Financial investment – available for sale' or 'Financial assets designated at fair value through profit or loss'. After initial measurement, amounts due from banks and loans and advances to customers are subsequently measured at amortised cost using the effective interest method, less allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the effective interest rate. The amortisation is included in 'Interest and similar income' in the profit and loss account. Any losses arising from impairment are recognised in the profit and loss account.

# Notes to the abridged financial statements at 31 March 2009

## **Financial liabilities**

Financial liabilities are classified as non-trading, held for trading or designated at fair value through profit or loss.

Non-trading liabilities are recorded at amortised cost applying the effective interest method.

Liabilities held for trading or designated as held at fair value through profit or loss are accounted for as indicated above.

## **Fair value**

Financial instruments carrying values in the financial statements closely represents their fair value due to the balances being short-term in nature and thus approximate their fair value.

## **Derecognition of financial assets and liabilities**

A financial asset or a portion thereof, is derecognised when the Company's rights to cash flows has expired; or when the Company has transferred its rights to cash flows relating to the financial assets, including the transfer of substantially all of the risks and rewards associated with financial assets or when control over the financial asset has passed.

A financial liability is derecognised when it is extinguished, that is when the obligation is discharged, cancelled or expired.

## **Derivative instruments**

Derivatives include forward foreign exchange contracts and embedded derivatives on profit share agreements.

All derivative instruments of the Company are recorded on balance sheet at fair value. Positive and negative fair values are reported as assets and liabilities respectively and are offset when there is both an intention to settle net and a legal right to offset exists.

Changes in the fair value of derivatives held for trading are included in operating income.

## **Financial guarantees**

In the ordinary course of business, the Company gives financial guarantees. Financial guarantees are initially recognised in the financial statements at fair value in 'Other liabilities' being the premium received. Subsequent to initial recognition, the Company's liability under each guarantee is measured at the higher of the amortised premium and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee.

The premium received is recognised in the profit and loss account in 'Net fees and commission income' on a straight line basis over the life of the guarantee.

## **Impairment of loans and advances**

The Company reviews its problem loans and advances at each reporting date to assess whether an allowance for impairment should be recorded in the profit and loss account. In particular, judgement by management is required in the estimation of the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance.

## **Consolidation and cash flow statement**

Since the Company is a wholly owned subsidiary, in accordance with FRS2 (Financial Reporting Standard Number 2: Accounting for Subsidiary Undertakings) the financial statements present information about the Company as an individual undertaking and not about its group. For the same reason, in accordance with FRS1 (Financial Reporting Standard Number 1: Cash Flow Statements), the Company is exempt from the requirements to prepare a cashflow statement.

## **Related party transactions**

The Company is exempt from disclosure of certain transactions required by FRS8 (Financial Reporting Standard 8: Related Party Disclosure), as it is a wholly owned subsidiary company and the consolidated financial statements of the Group in which the Company is included are publicly available. Any reference to Holding Company in the financial statements refers to either an immediate or other controlling party in the Investec Group.

## **Taxation**

Current and deferred tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

# Notes to the abridged financial statements at 31 March 2009

## 2. Review of the bank's risk profile

### Risk management

Risk is inherent in the Company's activities but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls.

The Company is exposed to credit risk, liquidity risk, financing and interest rate risk, foreign currency risk, market risk and operational risk. The Company's Board of Directors reviews and agrees policies for managing each of these risks and they are summarised below.

These policies have remained unchanged since 1 April 2007.

Risk Management processes throughout the Company are audited by the internal audit function, that examines both the adequacy of the procedures and the Company's compliance with the procedures. Internal Audit discusses the results of all assessments with management, and reports its findings to the Audit Committee of the Company's parent company.

Monitoring and controlling risks is primarily performed based on limits established by the Company or allocated to the Company by its parent company. Reports are prepared daily to ensure that all agreed limits are adhered to. A daily summary is circulated to Senior Management, to identify any breaches of Market limits, Foreign Exchange exposures, Interest Rate risk and Liquidity.

The Company's liquidity risk and exposure to interest rate and foreign exchange risks are managed by the Company's treasury department. Treasury seeks to reduce or eliminate financial risk, to ensure sufficient liquidity is available to meet foreseeable needs and to invest cash assets safely and profitably. It operates within policies and procedures agreed by the Company's Board of Directors and the ultimate parent Company, which include strict controls on the use of financial instruments in managing the Company's risk.

Although the Company does not actively trade, it is authorised to take small positions in currency within the overall limits imposed by the Company's Board of Directors.

### Credit risk

Credit risk is the risk that a customer or counterparty will be unwilling or unable to meet a commitment that it has entered into with the Company. The Company continuously reviews the credit quality of counter-parties and limits individual aggregate exposures accordingly. The Company's Board of Directors receives regular reports on credit exposures. These include information on large credit exposures, asset concentration, levels of bad debt provisioning and country exposure limits.

Total Credit Exposures are summarised below:

As at 31 March (£m)	2009	2008
Loans and advances to banks	1 409	1 189
Loans and advances to customers	606	513
Debt securities held to maturity	–	78
Derivative financial instruments	23	9
Other Assets	3	5
<b>Total on Balance Sheet Credit Exposures</b>	<b>2 041</b>	<b>1 794</b>
Guarantees	22	21
Undrawn Loans	52	112
<b>Total Credit Exposures</b>	<b>2 115</b>	<b>1 927</b>

Of the total 'Loans and advances to banks', £869.3m (61.8%) was due from Investec Bank UK Limited (2008: £732.8m).

Of the total 'Loans and advances to customers', 99.5% (£602.7m) was fully secured by collateral (2008: £510.9m). The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. The main types of collateral are residential property, commercial property, cash and investment portfolios.

£21.2 million of loans are considered as past due as at 31 March 2009 (2008: £nil). These loans are aged in the 90 to 180 days range.

During the year one loan of £6.9m was renegotiated (2008: £nil). This loan is included in loans and advances to customers.

In addition to placing funds with the Company's parent, funds are also placed with other banks. The Company has limits on the maximum value of funds it can place with any counterparty. These limits are approved by Group Credit and allocated to the Company. These limits are monitored daily and any breaches of limits are reviewed by the Company's Board of Directors.

# Notes to the abridged financial statements at 31 March 2009

An analysis of the counterparty risk on loans and advances to banks is shown below:

Fitch Rating	As at 31 March 2009				As at 31 March 2008

Unrated	–	–	–	–	40	0.3%	–	–
	<b>12 632</b>	<b>100.0%</b>	<b>1 409</b>	<b>100.0%</b>	<b>12 830</b>	<b>100.0%</b>	<b>1 189</b>	<b>100.0%</b>

## Financing and interest rate risk

Exposure to interest rate risk is the risk that arises when there is an imbalance between rate and non rate-sensitive assets, liabilities and off balance sheet items. The Company's policy is to maintain the interest rate risk at a minimal level except that management may invest the shareholders' funds in fixed or floating rate instruments in response to market conditions.

Page 14 shows management's estimate of the interest rate sensitivity gap as at 31 March 2009. Assets and liabilities are included in the table at the earliest date at which the applicable interest rate can change.

Company policy dictates that interest rates should not be fixed for any period greater than one year. If circumstances arise which require rates to be fixed for greater than one year, the Company enters into interest rate swaps to manage that risk. At 31 March 2009 no significant contracts were entered into.

The Company monitors interest rate risk using MPM (Million Pound Months) analysis. Using this analysis, exposures are expressed on the basis of residual term to earliest interest re-pricing date (in months) x nominal value of the exposure. Limits are set for each currency and are monitored daily.

Summary of MPM Position:

Currency	As at 31 March 2009			As at 31 March 2008		
	MPM Position £m	MPM Limit £m	% Utilisation	MPM Position £m	MPM Limit £m	% Utilisation
GBP	548	700	78%	328	500	66%
USD	77	500	15%	(133)	500	27%
JPY	(67)	85	79%	(53)	75	70%
EURO	(39)	250	15%	(24)	250	10%
Others	(14)	50	28%	46	50	92%
<b>Overall</b>	<b>744</b>	<b>1 000</b>	<b>74%</b>	<b>584</b>	<b>1 000</b>	<b>58%</b>

The Overall MPM limit represents the maximum exposure permitted. It does not equate to the sum of the individual currency limits.

# Notes to the abridged financial statements at 31 March 2009

## Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in realising assets or otherwise raising funds to meet commitments.

The Company's policy throughout the year has been to set limits for sight to eight days and sight to one month liquidity.

Surplus funds are invested in high quality liquid marketable instruments including money market instruments and bank deposits.

Debt securities held during the year comprise Certificates of Deposit. The Company does not enter into commodity contracts.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted repayment obligations. Repayments which are subject to notice are treated as if notice were given immediately. However, the Company expects that many customers will not request repayment on the earliest date the Company could be required to pay and the table does not reflect the expected cashflows indicated by the Company's deposit retention history.

	Up to one month	More than one month but not more than three months	More than three months but not more than six months	More than six months but not more than one year	Over one year	Total

# Notes to the abridged financial statements at 31 March 2009

## Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's foreign exposure arises from providing services to customers. The Company's policy is to hedge against foreign exchange risk by matching currency liabilities with currency assets. The Company's Board of Directors receive regular reports on foreign currency exposures.

Fluctuations in exchange rates can have an effect on profit and equity. The table below summarises the effect on profit of a 5% increase of exchange rates against sterling, assuming the net positions in each currency remain unchanged. The table shows the main exposures of the Company. A negative value indicates a decrease in profit. Due to the policy of matching currency liabilities with currency assets, the effect of exchange rate movements on profit is minimal.

	Increase in FX rate against GBP	31 March 2009 Effect on profit £	31 March 2008 Effect on profit £
USD	5%	768	10 696
NZD	5%	(1 787)	(2 712)
SEK	5%	(729)	(2 466)
CHF	5%	(1 381)	1 328
EUR	5%	2 589	1 283
CAD	5%	191	(1 055)
JPY	5%	(132)	(289)

## Operational risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Company does not expect to eliminate all operational risks, but through effective control procedures and by monitoring and responding to potential risks, the Company is able to manage the risks. All anticipated risks are identified and monitored, using Enterprise Risk Assessor software. Controls include effective segregation of duties, access, authorisation and reconciliation procedures, staff training, and assessment processes, including the use of internal audit.

## Interest rate sensitivity gap analysis

Part of the Company's return on financial instruments is obtained from controlled mismatching of the date on which interest receivable on assets and interest payable on liabilities are next reset to market rates or, if earlier, the dates on which the instruments mature.

The following table summarises these repricing mismatches on the Company's non-trading book as at 31 March 2009. Items are allocated to time bands by reference to the earlier of the next contractual interest rate repricing date and the maturity date, taking into account the effects of derivatives whose effect is to alter the interest base of an asset or liability.
