Commentary

Overview of results

We are pleased to announce that Investec Bank Limited, a subsidiary of Investec Limited, posted an increase in headline earnings attributable to ordinary shareholders of 22.0% from R1,389 million to R1,694 million. For full information on the Investec group results, refer to the combined results of Investec plc and Investec Limited.

Business unit review

Unless the context indicates otherwise, all comparatives referred to in the business unit review relate to the year ended 31 March 2007. Operating profit is before taxation and headline adjustments.

Salient operational features of the year under review include:

- The Private Client Activities division posted an increase of 47.2% in operating profit to R817 million (2007: R555 million). Strong earnings from lending continued to drive profitability. The division benefited from increased distribution capacity and greater penetration across all areas of specialisation, most notably Wealth Management and Growth and Acquisition Finance. The private client core lending book grew by 19.4% to R66.6 billion (2007: R55.8 billion) and the division increased its retail deposit book by 36.6% to R35.9 billion (2007: R26.3 billion).

Funds under advice grew 42.6% to R25.8 billion (2007: R18.1 billion).

- The Capital Markets division posted operating profit of R931 million (2007: R840 million), an increase of 10.8%. Growth was underpinned by a good performance from the division's advisory, structuring, asset creation and distribution activities. The division's lending book has grown by 20.5% to R25.9 billion (2007: R21.5 billion).
- Operating profit of the Investment Banking division decreased by 14.5% to R325 million (2007: R380 million). The Corporate Finance division had a stable pipeline, however large fees on a few transactions earned in the prior year were not repeated. The unlisted investments held within the Direct Investment and Private Equity portfolios continued to perform well. Results were however, impacted by a weaker performance from some of the listed investments.
- Other Activities posted a 44.8% increase in operating profit to R449 million (2007: R310 million) largely as a result of a strong increase in net interest income and a solid performance from some of the investments within the central funding portfolio.

Basis of preparation

The preliminary condensed consolidated financial statements of Investec Bank Limited ("the Bank") as at and for the year ended 31 March 2008 comprise the Bank and its subsidiaries ("the Group").

The Bank's principal accounting policies have been applied consistently over the current and prior financial years. During the year the Bank has adopted IFRS 7, Financial Instruments: Disclosure and IAS 1, Presentation of Financial Statements - Capital Disclosures (amendment). The adoption of IFRS 7 and the amendment to IAS 1 impacted the type and amount of disclosures made in the financial statements, but had no impact on the reported profit or financial position of the Bank.

These preliminary condensed consolidated financial statements have been prepared in terms of the recognition and measurement criteria of International Financial Reporting Standards, and the presentation and disclosure requirements of IAS 34, Interim Financial Reporting.

Comparative figures

Comparative figures have been reclassified to conform to changes in presentation in the current year. These are further described below:

Securitised assets and liabilities arising on securitisation

Securitised assets and related liabilities, which continue to be recognised on the balance sheet, are now disclosed as separate line items on the face of the balance sheet. In prior periods, securitised assets were included within loans and advances to customers and trading securities, and liabilities arising on securitisation were included in debt securities in issue. This change in disclosure is to provide more relevant and useful information to users.

IFRS 7, Financial Instruments: Disclosure

Following the implementation and adoption of IFRS 7, the classification of certain financial instruments into balance sheet classes were refined to achieve more appropriate disclosure. A reclassification to the prior year balance sheet of R17.9 billion reclassified from debt securities in issue to customer accounts.

Cash flow statement reclassifications

In order to more appropriately present the cash flow information, the following reclassifications were made to the prior year cash flow statement:

- Dividends paid of R311 million have been reclassified from operating activities to financing activities as they are seen to be a cost of obtaining financial resources; and
- Cash flows relating to amounts due from group companies of R3.25 billion have been reclassified from financing activities to banking activities as this better reflects the nature of these amounts.

Total assets, total liabilities, and amounts recognised in the income statement and equity were not affected by these reclassifications.
