IBP has a liquidity management philosophy that has been in place for many years. The bank continues to focus on maintaining a high level of readily available high-quality liquid assets targeting a minimum cash to customer deposit ratio of 25%. At 31 March 2023, the bank had £8.6 billion of cash and near cash to support its activities, representing approximately 44.4% of customer deposits.

Furthermore, the bank maintains an appropriate mix of term funding, placing a low reliance on interbank wholesale funding to fund core lending asset growth. IBP targets a diversified funding base, avoiding undue concentrations by investor types, maturity and market source, instrument and currency. Customer deposits amounted to £19.8 billion as at 31 March 2023 (31 March 2022: £18.6 billion).

IBP is not a highly geared bank. A number of banks that have come into difficulty in the past have been in excess of 40x geared. IBP's comparative ratio would be 9.8x.

Capital adequacy

18.5%

total capital ratio

IBP holds capital in excess of regulatory requirements and intends to perpetuate this philosophy and ensure that it remains well capitalised. The bank has never required shareholder or government support. As at 31 March 2023, the total capital ratio of IBP was 18.5% and the common equity tier 1 ratio was 12.7%.

The bank's anticipated 'fully loaded' Common Equity Tier 1 (CET1) ratio and leverage ratio are 12.4% and 9.6%, respectively (where 'fully loaded' assumes full adoption of IFRS 9 and full adoption of all CRD IV rules). These disclosures incorporate the deduction of foreseeable charges and dividends. Excluding this deduction, the CET1 ratio would be 21bps (31 March 2022: 37bps) higher.

We are on the Standardised Approach in terms of Basel, thus our risk-weighted assets represent a large portion of our total assets. IBP is in the early stages of a process to migrate from the Standardised Approach to the Internal Ratings Based (IRB) approach.
