As announced on 14 September 2018 following a strategic review, the group made a decision to demerge and separately list the Investec Asset Management business. The demerger and the listing of Investec Asset Management is subject to regulatory and shareholder approvals, and is expected to be completed during the second half of calendar year 2019.

We aim to maintain an **appropriate balance** between revenue earned from capital light activities and revenue earned from capital intensive activities.

IBP: key objectives

Maintain healthy capital ratios

- Always held capital in excess of regulatory requirements
- Targets:
 - Common Equity Tier 1 ratio >10% (11.2% at 31 March 2019)
 - Tier 1 ratio >11% (12.9% at 31 March 2019)
 - Total capital adequacy: 14% – 17% (17.0% at 31 March 2019)
 - Leverage ratio >6% (7.9% at 31 March 2019)
- Capital strength maintained without recourse to shareholders, new investors or government assistance

Maintain robust liquidity management philosophy

- Appropriately manage our levels of surplus liquidity and cost of funding
- Maintain high level of readily available, high-quality liquid assets - minimum cash to customer deposit ratio of 25% (50.3% as at 31 March 2019)
- Maintain diversified sources of funding

Perpetuate the quality of the balance sheet

Focus on revenue drivers

- Continue to build our client franchises and client base in the UK – focus on direct relationships with entrepreneurs, mid-sized corporates and high net worth clients
- Generate high-quality income through diversified revenue streams and businesses
- Leverage our private client platform (across banking and wealth management)
- Continue to grow FUM
- Moderate loan growth, emphasis on diversified portfolios
- Increase transactional activity

Maintain operational efficiency

- IBP cost to income ratio was 77.9% at 31 March 2019 (blend of banking and wealth management businesses)
- Targeting cost to income of below 65% for the IBP Specialist bank and between 73-77% for IBP Wealth & Investment
- Our cost to income ratio has been elevated as we have been investing in infrastructure and resources to grow the franchise, notably the build-out of the Private Bank
- With the investment in the Private Bank largely complete, management is committed to an increased focus on cost discipline

IBP: focusing on capital light activities

- We have realigned our business model over the past few years and focused on **growing our capital light businesses**
- We have **significantly increased our third party funds under management** – a key capital light annuity income driver – in the Wealth & Investment business
- Our total capital light activities **account for 50% of IBP's revenue**

IBP's operating fundamentals

IBP: profitability supported by diversified revenue streams

Annuity income

Revenue versus expenses

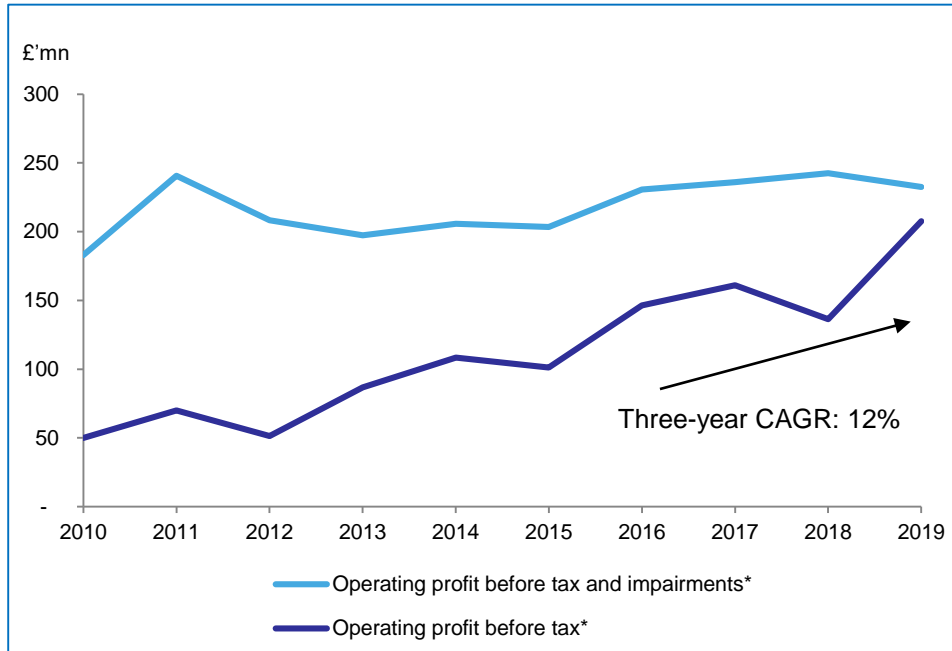

- **High level of annuity income*** (currently 66% of total operating income) which has been enhanced by the growth in our wealth management business
- **Total capital light activities account for 50% of IBP's income**

- We are focusing on managing costs while building for the future
- Our cost to income ratio has been elevated as we have been **investing in infrastructure and resources to grow the franchise**, notably the build-out of the private client offerings

*Where annuity income is net interest income and annuity fees. ^The group has changed its cost to income ratio definition to exclude operating profits or losses attributable to other non-controlling interests. As such, the cost to income ratio is calculated as: operating costs divided by operating income (net of depreciation on operating leased assets and net of operating profits or losses attributable to other non-controlling interests).

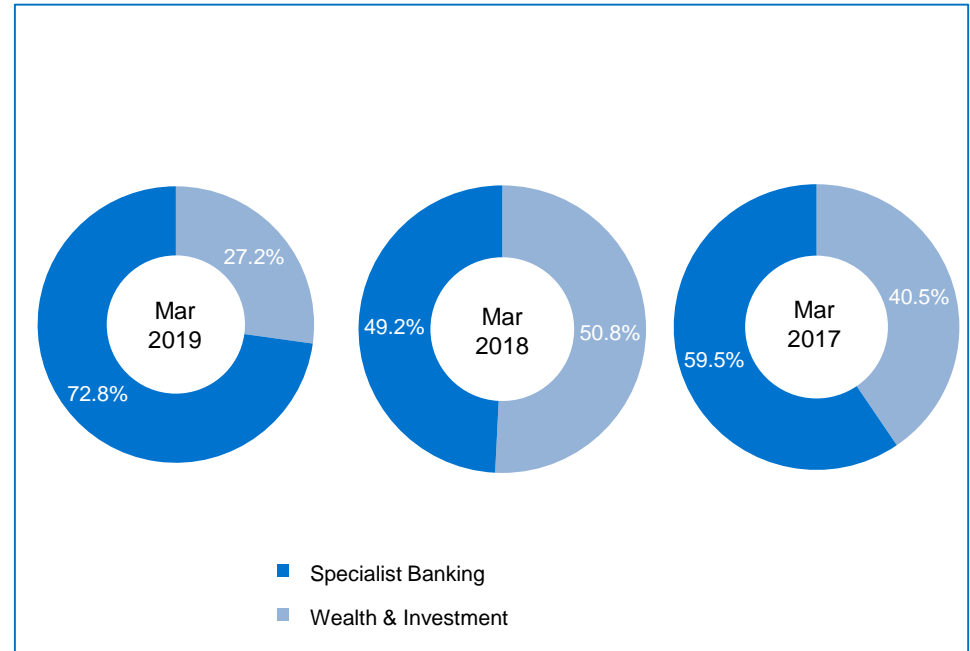

IBP: profitability supported by diversified revenue streams

Operating profit before tax*

- **We have grown operating profit** (increased by £61mn over the past three years to £208mn; CAGR of 12%)
- Since 2008 results have been impacted by elevated impairments driven by the legacy portfolio. This is particularly evident in the 2018 financial year as increased impairments were recognised in anticipation of accelerated exits on certain legacy assets. This is not expected to be repeated, as evident in the 2019 financial year there was no repeat of prior substantial legacy losses.
- It is also worth noting that we remained profitable throughout the crisis and have built a solid client franchise business which has supported growth in revenue.

Business mix percentage contribution to operating profit*

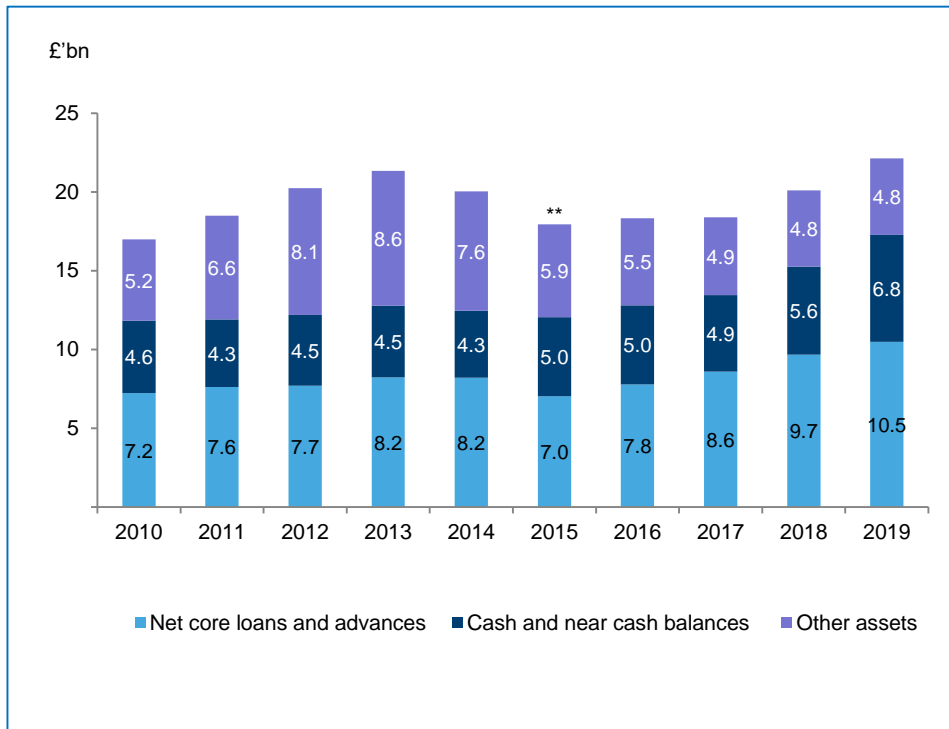

- Operating profit is balanced between Specialist banking and wealth & Investment businesses
- Higher contribution from the Specialist banking business in 2019 financial year largely driven by improved banking performance

*Before goodwill, acquired intangibles, non-operating items, taxation and after non-controlling interests

IBP: consistent asset growth, gearing ratios remain low

Total assets composition

- Our core loans and advances have grown moderately over the past 10 years (CAGR of 4.2% since 2010)
- Steady growth in cash and near cash balances (CAGR of 4.4% since 2010)

Gearing* remains low

- We have **maintained low gearing ratios*** with total gearing at 10.2x and an average of 10.8x since 2010

*Gearing ratio calculated as Total Assets divided by Total Equity ** Loans and deposits in FY15 impacted by the sale of group assets, largely in Australia

IBP: exposures in a select target market

- Credit and counterparty exposures are to a **select target market**:
 - High net worth and high income clients
 - Mid to large sized corporates
 - Public sector bodies and institutions
- The majority of exposures reside **within the UK**
- We typically originate loans with the intent of holding these assets to maturity, thereby developing a 'hands-on' and long-standing relationship with our client

Gross core loans by country of exposure at 31 March 2019

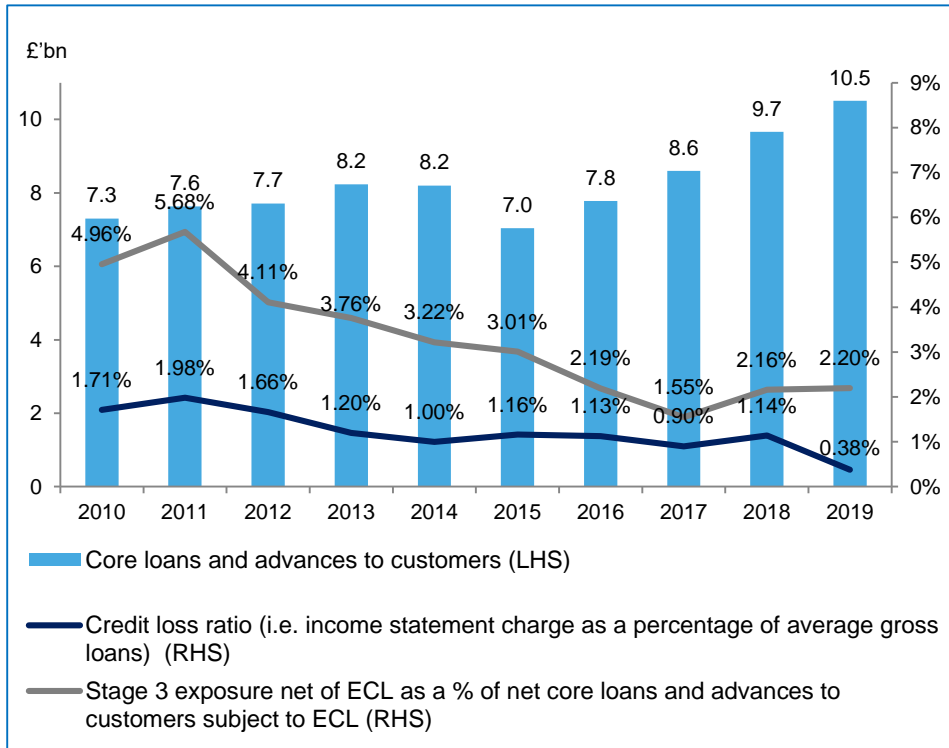

Gross core loans by risk category at 31 March 2019

IBP: sound and improving asset quality

Core loans and asset quality

- **Credit quality on core loans and advances for the year ended 31 March 2019:**
 - **Total income statement ECL impairment charges** amounted to £25.0mn, a substantial reduction from £106.1mn in the prior period, primarily reflecting a reduction in legacy impairments
 - The **credit loss ratio[#]** amounted to 0.38% (1 April 2018: 1.14%), now within its **long term average range**
 - **Stage 3 exposures net of ECLs decreased from £372mn at 1 April 2018 to £211mn** predominantly driven by a reduction in legacy exposures
 - **Stage 3 exposure net of ECLs as a % of net core loans and advances subject to ECLs** amounted to 2.2% (1 April 2018: 4.3%)

[#]Expected credit loss (ECL) impairment charges on gross core loans and advances as a % of average gross core loans and advances subject to ECL

IBP: diversified funding strategy and credit ratings

- Investec's funding consists **primarily of customer deposits**
- Investec adopts a **conservative and prudent funding strategy**
- Positive rating trajectory:** over the past few years both IBP and Investec plc have received ratings upgrades

Conservative and prudent funding strategy

- ➔ **Maintaining a high base of high-quality liquid assets**
- ➔ **Diversifying funding sources**
- ➔ **Limiting concentration risk**
- ➔ **Low reliance on wholesale funding**
- ➔ **Maintaining a stable retail deposit franchise**

Selected funding sources

Credit ratings*

- In February 2019, **Moody's** upgraded IBP's long-term deposit rating to A1 (stable outlook) from A2 (positive outlook) and its baseline credit assessment (BCA) to baa1 from baa2.
- On 1 March 2019, **Fitch** placed the Long Term Issuer Default Ratings (IDR) of 19 UK Banking Groups (including IBP) on Rating Watch Negative (RWN). This follows Fitch placing the UK sovereign's AA IDR on RWN as a result of Brexit uncertainty. In September 2017, **Fitch** upgraded IBP's Long-Term Issuer Default Rating (IDR) to **BBB+** from BBB and its Viability Rating (VR) to bbb+ from bbb.
- Investec plc's long-term issuer rating was upgraded by Moody's to Baa2 in February 2016, and to Baa1 in April 2016.

IBP's long-term ratings

*A rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal at any time by the assigning rating organization.

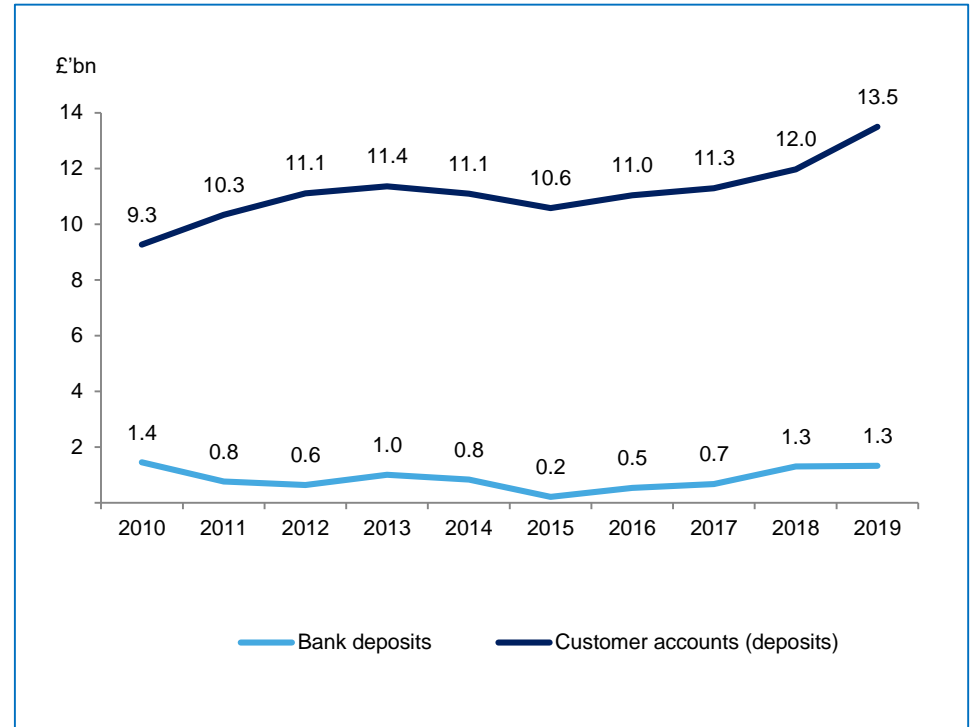

[^]of which 933mn relates to retail customers. [#]Rating Watch Negative

IBP: primarily customer deposit funded with low loan to deposit ratio

Fully self-funded: healthy loan to deposit ratio

Total deposits: growing customer deposits

- **Customer deposits have grown by 46% (c.4% CAGR) since 2010 to £13.5bn at 31 March 2019**
- Advances as a percentage of customer deposits amounted to 77.7%

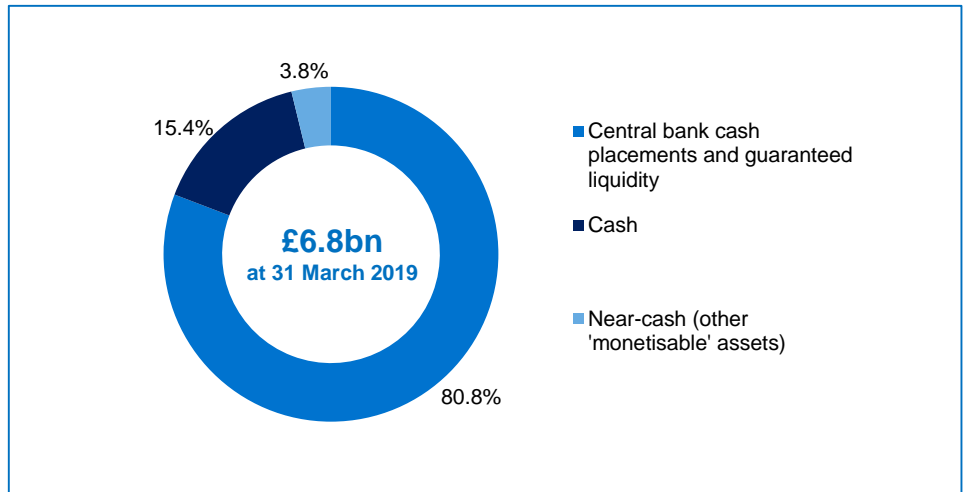

- Increase in retail deposits and reduced reliance on wholesale deposits
- Fixed and notice customer deposits have continued to grow and our customers display a strong 'stickiness' and willingness to reinvest in our suite of term and notice products

*FY15 impacted by the sale of group assets, largely in Australia

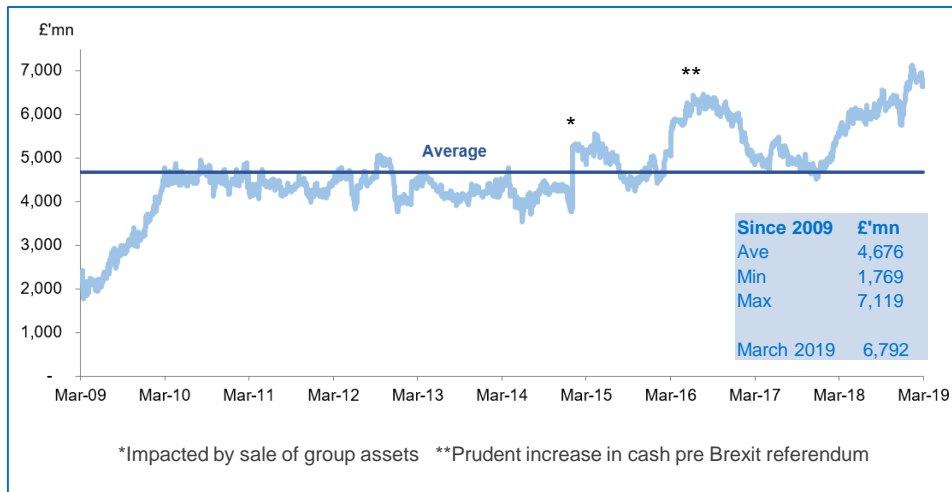

IBP: maintaining robust surplus liquidity

- We **maintain** a high level of readily available, high-quality **liquid assets** – targeting a minimum cash to customer deposit ratio of 25%. These balances have increased since 2010 (£4.6bn) to £6.8bn at 31 March 2019 (**representing 50% of customer deposits**)
- At 31 March 2019 the **Liquidity Coverage Ratio** reported to the Prudential Regulatory Authority for IBP (solo basis) was **291%** and the **Net Stable Funding Ratio[^]** was **126%** - both metrics well ahead of current minimum regulatory requirements

Cash and near cash composition

High level of cash and near cash balances

Depositor concentration by type

[^]The LCR is calculated using our own interpretations of the EU Delegated Act. Ahead of the implementation of the final NSFR rules, the bank has applied its own interpretations of regulatory guidance and definitions from the BCBS final guidelines, to calculate the NSFR. The reported LCR and NSFR may change over time with regulatory developments and guidance

IBP: sound capital base and capital ratios

Total capital

Total risk-weighted assets: high RWA density

- **We have continued to grow our capital base** and did not require recourse to government or shareholders during the crisis
- Our total equity has grown by 83% since 2010 to £2.2bn at 31 March 2019 (CAGR of c.7%)
- The proposed transaction is expected to further enhance the efficiency of total capital resources

- As we use the Standardised Approach for our Basel III risk RWA calculations, our RWA represent a large portion of our total assets
- IBP's Total RWAs / Total assets is 66%, which is higher relative to many UK banks on the Advanced Approach
- As a result we **inherently hold more capital**

IBP: sound capital base and capital ratios (continued)

- Investec has **always held capital in excess of regulatory requirements** and intends to perpetuate this philosophy and ensure that it remains well capitalised
- The bank has **never required shareholder or government support**
- In December 2016, the Bank of England set the preferred resolution strategy for IBP to be 'modified insolvency'. As a result, the BoE has therefore set **IBP's MREL requirement as equal to its regulatory capital requirements** (Pillar 1 + Pillar 2A) and as such no MREL issuance/impact is expected
- IBP is not expected to be subject to the Banking Reform Act ring-fencing requirements**, which are applicable to all large UK deposit takers, as it falls below the £25bn *de minimis* threshold for core deposits

[^]The reported CET 1, T1 and total capital adequacy amounts and ratios are calculated applying the IFRS 9 transitional arrangements.

^{^^}Based on the group's understanding of current regulations, 'fully loaded' is based on CRR requirements as fully phased in by 2022, including full adoption of IFRS 9. As a result of the adoption of IFRS 9 Investec Bank plc elected to designate its subordinated fixed rate medium-term notes due in 2022 at fair value. By the time of full adoption of IFRS 9 in 2023, these subordinated liabilities will have reached final maturity and will be redeemed at par value. The remaining interest rate portion of the fair value adjustment at 31 March 2019 of £17.7 million (post-taxation), has therefore been excluded from the fully loaded ratios as it will be released into profit and loss over the remaining life of the instrument.

^{**} The leverage ratios are calculated on an end-quarter basis.

*Since 2014 capital information is based on Basel III capital requirements as applicable in the UK. Comparative information is disclosed on a Basel II basis. Since 2014 ratios incorporate the deduction of foreseeable charges and dividends as required in terms of the regulations. Excluding this deduction IBP's CET1 ratio would be 13bps higher. The leverage ratio prior to 2014 has been estimated.
