

Commercial rooftop solar funding

Investec Supplier Finance

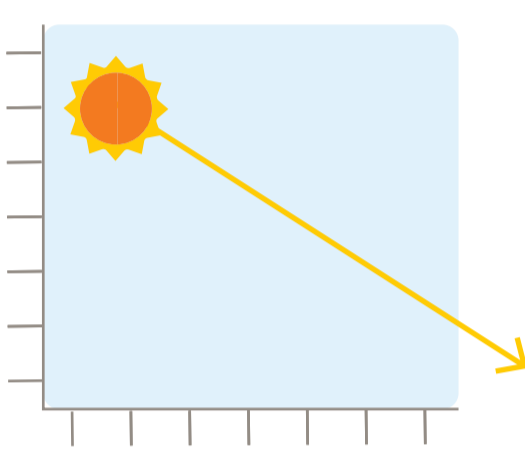

What we do

Investec Supplier Finance is a niche asset finance specialist offering tailor made, turnkey finance solutions across a range of different sectors, including commercial rooftop solar. We endeavour to create finance solutions to suit your cash flow requirements.

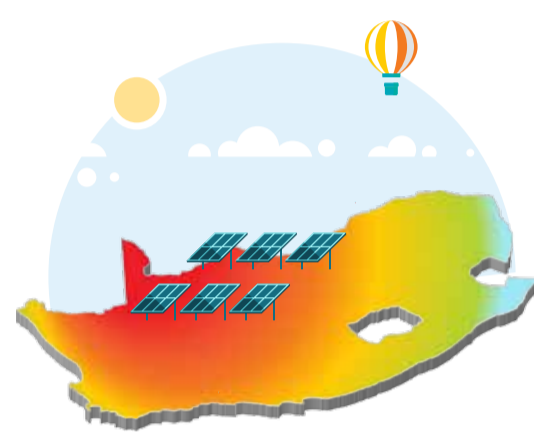

Why solar?

The ever increasing cost of electricity. A trend that is likely to continue into the future

The declining costs of solar technology increases the feasibility of solar installations

South Africa has some of the highest levels of solar irradiation in the world

Investec Supplier Finance looks to partner with EPC's, property funds, owners of large property portfolios as well as commercial and industrial companies for the roll out of solar plants.

Office, retail and industrial applications are best poised to take advantage of solar technology given their constant demand for energy throughout the day.

Benefits

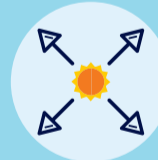

Creation of asset base through the ownership of solar PV systems

Additional source of revenue/cost saving

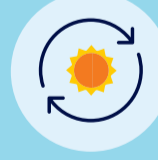

The ever-green nature and stable returns of solar assets makes it an attractive fixed income investment

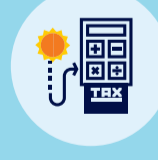

Long useful life of solar PV assets

Increased marketability of property

Reduced environmental impact

Tax benefits

Value proposition

Avoid upfront capital outlay

- » Deploy capital in core assets
- » The funding of solar assets will allow the client to ramp up to the roll-out of solar projects

Sculpted repayments to suit your cash flows

- » Match the debt repayments to the electricity savings generated

Financing options

- » Term loan
- » Solar SPV
