calendar month preceding the calendar month in which the applicable Interest Payment Date occurs, where the applicable Interest Payment Date is the first day of any calendar month. If the applicable Interest Payment Date occurs on a day other than the first day of a calendar month, then the Reference CPI shall be determined in accordance with the following formula:

$$\text{Ref.CPI} = \text{Ref. CPI}_j + [(t - 1) / D] \times (\text{Ref. CPI}_{j+1} - \text{Ref. CPI}_j)$$

Where:

- (a) Ref.CPI_j is the reference CPI for the first day of the calendar month which shall be the CPI Index for the fourth calendar month preceding the calendar month in which the applicable Interest Payment Date occurs;
- (b) Ref.CPI_{j+1} is the Reference CPI for the third calendar month preceding the calendar month in which the applicable Interest Payment Date occurs;
- (c) T is the calendar day corresponding to the applicable Interest Payment Date; and
- (d) D is the number of days in the calendar month in which the applicable Interest payment Date occurs.

Adjustment to CPI Index

If the CPI Index is reset, then a new Reference CPI that is applicable for the issue date will (if the Calculation Agent deems it necessary) be calculated in such a way that the Final Redemption Amount is the

AB

same immediately before and after the reset.

Failure/delay of Index to published

If as a result of a one month delay in the publication of the CPI Index, the reference CPI is not available in order to make a determination in accordance with the formula above, then subject to the terms below, a substitute CPI Index value calculated as follows will be used:

$$CPI_m = CPI_{m-1} \times (CPI_m - 1 / CPI_{m-13})^{1/12}$$

Where:

(a) CPI_m is the Substitute CPI Index for the month that is required;

(b) m = month

in the event of a delay of more than one month, CPI_m shall be determined in accordance with the following formula:

$$CPI_m = CPI_{m-n} \times (CPI_{m-n} / CPI_{m-n-12})^{n/12}$$

Where:

(a) n is the number of months' delay.

When the above formulae are used to calculate a Substitute Reference CPI value, then such formulae shall be used for all subsequent calculations that rely on that month's Index Ratio, and shall not be replaced by the actual Reference CPI when the CPI Index is reported, except for use in the above formulae. Further, when the above formulae are used to

AS

calculate a Substitute Reference CPI value, the last CPI Index that has been reported will be used to calculate Reference CPI values for the month(s) in which the CPI Index has not been reported timeously.
