(a) Interest Rate(s)

(i) The Reference Rate plus the Margin for the period described in 39(a) above.

(ii) If the conditions set out in 43(ii)(b)(i) are met, 20.35% minus ZAR-JIBAR-SAFEX with a Designated Maturity of 3 months, for the period described in 39(b) above.

24 January, 24 April, 24 July and 24 October (as adjusted by the applicable Business Day Convention) of each year, for the period(s) as described above

(c) Any other terms relating to the particular method of calculating interest

The Interest Amount for each Interest Period for the period described in 39(b) will be calculated as follows:

20.35% minus ZAR-JIBAR-SAFEX with a Designated Maturity of 3 months

In the event that the Interest Amount for an interest period as calculated by the Calculation Agent in terms of the above formula is zero, no interest will be paid by the Issuer in respect of such interest period.

If the Interest Amount for an interest period as calculated by the Calculation Agent in terms of the above formula is less than zero, then no interest will be paid by the Issuer on the Interest Payment Date in respect of such Interest Period and the negative coupon amount so calculated (“the Deferred Amount”) will be deferred to the next Interest Payment Date, If the Interest Amount payable by the Issuer on such next Interest Payment Date is not sufficient to set off against the total Deferred Amount, or is itself a Deferred Amount, the principle set out above will again apply in relation to the aggregate Deferred Amounts or any portion thereof, as the case may be and such aggregate Deferred Amounts will be again deferred to the following Interest Payment Date, provided that on the Maturity Date or the Early Redemption Date, as the case may be, any unpaid Deferred Amounts will be deducted from the Final Redemption Amount or the Early Redemption Amount payable by the Issuer, and the Redemption provided that the Redemption Amount payable by the Issuer shall not be less than zero.

The aggregate of the outstanding Deferred Amounts shall bear interest from the Interest Payment Date on which the Deferred Amount was first calculated in terms of the above formula until the Interest Payment Date on which it is paid in full, at a rate of ZAR-PRIME-AVERAGE (averaged daily and compounded monthly), which rate can be found on <https://www.resbank.co.za/en/home/what-we-do/statistics/key-statistics/selected-historical-rates>. This amount will be capitalised to the Deferred Amount and will itself constitute a further Deferred Amount.
