Trading Terms	On notice, subject to applicable stock exchange settlement terms

## Fund Characteristics and Objectives

The Investec Global Balanced Portfolio (USD) seeks to provide a balanced return of capital and income in US Dollars over the long term. We aim to achieve this by investing across a broad range of traditional and non-traditional asset classes and securities across the globe.

- The portfolio is an actively managed multi-asset class portfolio that leverages off our well-established top-down and bottom-up global investment processes.
- A material allocation of the portfolio is invested in direct equities listed in developed equity markets. This allocation to direct global equities will be biased towards larger capitalisation stocks that have sustainable competitive advantages in growing markets ("Global leaders").
- In addition to direct equities, we will use structured products, third-party mutual funds and exchange traded products where appropriate.

## Cumulative Return Chart (USD, Net of fees)

The chart represents the returns generated by a \$100 investment made at inception. Investment performance is for illustrative purposes only and calculated by taking actual initial fees and ongoing fees into account for amount shown with income reinvested on reinvestment date.

## Important information that should be considered prior to investing

The portfolios are generally medium to long term investments and the Portfolio Manager gives no guarantee with respect to the capital or the return of the portfolio. Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell. The price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Returns and benefits are dependent on the performance of underlying assets and other variable market factors and are not guaranteed. Levels and basis for taxation may change. Exchange rate fluctuations may have an adverse effect on the value of certain investments. The Portfolio Manager has a right to close the portfolio to new investors in order to manage it more efficiently where required.
