## Fund Characteristics and Objectives

The Investec Managed High Equity Portfolio including Offshore aims to deliver consistent growth of capital and income over the long term with a bias towards higher equity exposure.

The portfolios are actively managed, based on both a "top-down" and "bottom-up" approach. A top-down view of economies and markets is used to assess the relative attractiveness of equities, bonds, property and cash, and to determine an optimum exposure to offshore markets where appropriate.

Stock selection is based on a "bottom-up" approach, focusing on businesses with good quality earnings streams that are likely to provide superior earnings growth, and where valuations indicate that such growth can be purchased at a reasonable price, best described as Growth at a Reasonable Price.

Equity exposure is typically limited to a range of 60-75%, with the balance invested in other asset classes such as property, bonds, cash and preference shares (to optimise after-tax income).

An important differentiator in the Managed Portfolio range is the use of instruments like redeemable and non-redeemable preference shares to enhance after-tax returns.

The portfolios are not limited by Regulation 28 of the Pension Funds Act.

## Portfolio Performance

- Investec Managed High Equity Portfolio including Offshore - R324
- (ASISA) South African Multi Asset High Equity - R294

**Important information that should be considered prior to investing**

The portfolios are generally medium to long term investments and the Portfolio Manager gives no guarantee with respect to the capital or the return of the portfolio. Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell. The price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Returns and benefits are dependent on the performance of underlying assets and other variable market factors and are not guaranteed. Levels and basis for taxation may change. Exchange rate fluctuations may have an adverse effect on the value of certain investments. The Portfolio Manager has a right to close the portfolio to new investors in order to manage it more efficiently where required.
