## Fund Characteristics and Objectives

The investment objective of the Investec World Axis Cautious Fund (the "Fund") is to provide investors with capital growth over the long term and income, whilst aiming to outperform the stated fund benchmark with below benchmark risk over three year rolling periods. Short term performance may fluctuate from the benchmark performance.

Our portfolio manager strives to outperform the benchmark over the longer term by focusing on:

- Selecting investment managers who provide returns in proportion with risk taken,
- Allocating assets based on our in house strategic view of the market environment,
- Blending investment managers appropriately in order to reduce risk without infringing on underlying performance,
- Performing a stringent due diligence on all investment managers that is based on both a qualitative and quantitative investment process.

This Fund is FSCA approved.

## Cumulative Return

— Investec World Axis Cautious Fund - \$143  
 — Cautious Peer Group Benchmark - \$129

#### **Glossary Summary**

Annualised return: is the average return per year over the period.

The Effective Annual Cost (EAC): Is a measure which allows investors to compare the charges that may be incurred and their impact on investment returns when investing in different financial products. It is expressed as an annualised percentage.

Method of calculation: Unit prices are calculated on a net asset value basis by determining the total market value of all assets in the Fund, including any income accruals, less any permissible deductions.

The Net Asset Value (NAV): represents the value of the assets of a fund less its liabilities.

Total Expense Ratio (TER): Includes the annual management fee, performance fee and administrative costs but excludes portfolio transaction costs (except in the case of an entry or exit charge paid by a fund when buying or selling units in another fund) expressed as a percentage of the average daily value of the Fund calculated over a rolling three years (or since inception where applicable) and annualised to the most recently completed quarter.

Transaction cost (TC): Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.

Total investment charge (TIC): This is the sum of the TER and TC.

#### **Specific Fund Risks**

Investments in general and foreign investments in particular involve numerous risks and might not be suitable for all investors. Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Please refer to [https://www.investec.com/en\\_za/investment/unit-trusts.html?t-5](https://www.investec.com/en_za/investment/unit-trusts.html?t-5) for a list of Fund specific risk which should be considered by investors prior to investing.

#### **Important information that should be considered prior to investing**

Collective investment schemes ("CISs") are generally medium to long term investments and the Manager gives no guarantee with respect to the capital or the return of the Fund. CISs trade at ruling prices and can engage in borrowing of up to 10% of fund net asset value to bridge insufficient liquidity and scrip lending. A schedule of fees and charges are available on request from the Fund Manager. Performance shown is that of the Fund and individual investor performance may differ as a result of initial fees, actual investment date, date of any subsequent reinvestment and any dividend withholding tax. Past performance is not necessarily a guide to future performance. Where the Fund invests in the participatory interests of foreign collective investment schemes these may levy additional charges which are included in the relevant TER. The Manager has a right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. The value of participatory interests or the investment may go up or down. Different classes of units apply to the Fund and the information presented is for the most expensive class. The price or value of such securities and instruments may rise or fall and in some cases investors may lose their entire principal investment. Returns and benefits are dependent on the performance of underlying assets and other variable market factors and are not guaranteed. A higher Total Expense Ratio (TER) does not necessarily imply a poor return, nor does a low TER imply a good return. Purchase and redemption instructions must be received by the Administrator prior to the weekly cut-off time as indicated in the 'Fund Overview' section of this document. Additional information on the Fund, including information on the EAC and Fund prices can be obtained, free of charge, at [https://www.investec.com/en\\_za/investment/unit-trusts.html?t-5](https://www.investec.com/en_za/investment/unit-trusts.html?t-5).
