## Fund Characteristics and Objectives

The Investec Retirement High Equity Portfolio aims to deliver consistent growth of capital and income over the long term with a bias toward equity investment.

- The portfolio is actively managed using a “top-down” view of economies and markets to assess the relative attractiveness of equities, bonds, property and cash, and to determine an optimum exposure to offshore markets. This “top-down” view provides insight into investment themes in the equity market.
- Stock selection is based on a “bottom-up” approach, focusing both on existing and emerging blue chip companies that are likely to provide superior earnings growth and where valuations indicate that such growth can be purchased at a reasonable price.
- The portfolio meets the prudential guidelines of Regulation 28 of the Pension Funds Act. As such, equity exposure is limited to a maximum of 75%, although it is typically between 60% and 75%, with the balance invested in other asset classes such as property, bonds, cash and preference shares.

## Portfolio Performance
