### Fund Characteristics and Objectives

The Investec Wealth & Investment BCI Dynamic Equity Fund's objective is to provide investors with capital growth and income over the long term.

- The Investec Wealth & Investment BCI Dynamic Equity Fund ("the fund") employs a primarily "bottom-up" investment approach attempting to identify equities that offer above average returns. While we invest across the full spectrum of the JSE, we place emphasis on identifying emerging companies.
- Our disciplined approach may result in us being under- or overweight in terms of certain sectors over time and therefore our performance will not always be correlated with our benchmark, (FTSE JSE Capped SWIX).
- We aim to invest in good quality companies that remain reasonably priced and that continue to deliver attractive earnings growth.
- The portfolio may time to time invest in listed and unlisted financial instruments. The manager may also include forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.

### Performance (ZAR, Net of Fees)

The chart represents the returns generated by a R100 investment made at inception. Investment performance is for illustrative purposes only and calculated by taking actual initial fees and ongoing fees into account for amount shown with income reinvested on reinvestment date.  
\*\*Peer group reference. While the IW&I BCI Dynamic Equity fund is registered in the (ASISA) South African EQ General category, the (ASISA) South African EQ Mid/Small Cap category is the most relevant peer group reference given the mandate and composition of the portfolio.

BOUTIQUE  
+ COLLECTIVE  
INVESTMENTS

Investec  
Wealth & Investment

### High Risk

- This portfolio has a higher exposure to equities than any other risk profiled portfolio and therefore tend to carry higher volatility due to high exposure to equity markets
- Expected potential long term returns are high, but the risk of potential capital losses is high as well, especially over shorter periods
- Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks
- Therefore, it is suitable for long term investment horizons.

# INVESTEC WEALTH & INVESTMENT BCI DYNAMIC EQUITY FUND (CLASS A) – QUARTERLY MINIMUM DISCLOSURE DOCUMENT

30 June 2020

## FAIS Conflict of Interest

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instances portfolios invest in other portfolios which form part of the BCI Scheme.

## Glossary Summary

**Annualised return:** Annualised return is the average return per year over the period.

**The effective annual cost (EAC):** Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at [www.bcis.co.za](http://www.bcis.co.za).

**Method of calculation:** Unit prices are calculated on a net asset value basis by determining the total market value of all assets in the portfolio, including any income accruals, less any permissible deductions. The following costs may be deducted from the portfolio: brokerage fees, security services tax, auditor's fees, bank charges, trustee and custodian fees and the annual management fees of the manager.

**NAV:** The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

**Total expense ratio (TER):** The current TER cannot be regarded as an indication of future TER's. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Fund. Includes the annual management fee, performance fee and administrative costs but excludes portfolio transaction costs (except in the case of an entry or exit charge paid by a fund when buying or selling units in another fund) expressed as a percentage of the average daily value of the Fund calculated over a rolling three years (or since inception where applicable) and annualised to the most recently completed quarter.

**Transaction cost (TC):** Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER Calculations are based on actual data where possible and best estimates where actual data is not available.

**Total investment charge (TIC):** This is the sum of the TER and TC.

## Specific Fund Risks

**Concentration risk:** Investments may be primarily concentrated in specific areas (e.g. countries/geographical regions and/or industry sectors), in terms of investment style (e.g. income or growth), in individual holdings and/or in a number of other ways. This may mean the value of the Fund may decrease whilst more broadly invested funds might grow.

**Country and political risk:** Investments or underlying components of your Investments may be affected by their link or relationship to specific countries which could be exposed to political or economic events affecting companies, interest rates or currencies.

**Currency exchange risk:** Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

**Default risk:** There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

**Developing market risk:** Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

**Equity investment risk:** The value of equities and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default, the owners of their equity rank last in terms of any financial payment from that company.

**Interest rate risk:** The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

**Liquidity risk:** The risk that a given security or asset cannot be traded quickly enough in the market to prevent a loss (or make the required profit).

**Macroeconomic risk:** Refers to the risk that conditions such as exchange rates, growth rate, gross domestic product, inflation, price levels, national income, changes in employment, government regulation or political stability, will affect an investment usually in a foreign country.

**Multi-asset investment risk:** The Fund is subject to possible financial losses in multiple markets and may underperform more focused funds.

**Return on capital:** Neither capital preservation nor returns are guaranteed.

**Settlement risk:** The risk that a counterparty does not deliver a security or its value in cash as per agreement when the security was traded after the other counterparty or counterparties have already delivered security or cash value as per the trade agreement.

**Taxation risk:** The tax treatment of any Investment is determined by the specific circumstance of each client. Taxation may change during the lifetime of an Investment. This may result in unanticipated tax liabilities. You should obtain tax advice in order to be aware of the potential liability before making an Investment. If your circumstances change or you are uncertain of how an Investment might affect your own tax position you should seek professional advice.

**Third-party operational risk:** The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure. Third-party operational risk: The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

## Important information that should be considered prior to investing

Boutique Collective investment schemes in securities (CISs) are generally medium to long term investments and the manager gives no guarantee with respect to the capital or the return of the Fund. CISs are traded at ruling prices and can engage in borrowing, up to 10% of fund net asset value to bridge insufficient liquidity, and scrip lending. A schedule of charges, fees and advisor fees is available on request from the Investec Wealth and Investment Management (Pty) Ltd. Additional advisor fees may be paid and if so, are subject to the relevant FAIS disclosure requirements. Performance shown is that of the fund and individual investor performance may differ as a result of initial fees, actual investment date, date of any subsequent reinvestment and any dividend withholding tax and past performance is not necessarily a guide to the future. Performance figures above are based on lump sum investments, using NAV to NAV figures net of fees with gross income reinvested, in South African Rands. The value of participatory interests on the investment may go up or down. Different classes of units apply to the fund and the information presented is for the most expensive class. Fund valuation occurs at 15h00 and transaction cut-off time is 14h00 SA time each business day. This fund may be closed to new investors in order to be managed in accordance with the mandate. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. A higher Total Expense Ratio (TER) does not necessarily imply a poor return, nor does a low TER imply a good return. Where funds invest in the participatory interests of foreign collective investment schemes these may levy additional charges which are included in the relevant TER. The ratio does not include transaction costs. The current TER cannot be regarded as an indication of the future TERs. Fund prices are published each business day in selected media. Additional information on the fund, including information on the EAC can be obtained, free of charge, at <https://www.investec.co.za/products-and-services/investing/unit-trusts.html?ad>.

## Disclaimer:

The Manager, PO Box 1655, Cape Town, 8000, Tel: 0860 500 100 is registered under the CIS Control Act. The scheme trustee is The Standard Bank of South African Limited, Telephone 021 441 4100. All information provided is product related, and is not intended to address the circumstances of any Financial Service Provider's (FSP) clients. In terms of the Financial Advisory and Intermediary Services Act, FSPs should not provide advice to investors without appropriate risk analysis and after a thorough examination of a particular client's financial situation. While the Manager appointed Investec Wealth and Investment Management (Pty) Ltd (IWIM) 2013/001592/07, as its authorised agent to solicit investment and to manage the co-named fund, the Manager retains full legal responsibility for the co-named fund. The relationship between the Manager and IWIM is governed by the CIS Control Act, the scheme deed, and formal written agreements. IWIM is an authorised financial services provider no. 44897.
