Investec Bank plc
Issue of GBP Phoenix Kick Out Notes with Capital at Risk
under the
£2,000,000,000 Impala Bonds Programme

The Base Prospectus referred to below (as completed by these Final Terms) has been prepared on the basis that, except as provided in sub-paragraph (ii) below, any offer of Notes in any Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "**Relevant Member State**") will be made pursuant to an exemption under the Prospectus Directive, as implemented in that Relevant Member State, from the requirement to publish a prospectus for offers of the Notes. Accordingly any person making or intending to make an offer of the Notes may only do so:

- (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer; or
- (ii) in those Public Offer Jurisdictions mentioned in paragraph 8 of Part B below, provided such person is one of the persons mentioned in paragraph 8 of Part B below and that such offer is made during the Offer Period specified for such purpose therein.

Neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any offer of Notes in any other circumstances. The expression "**Prospectus Directive**" means Directive 2003/71/EC (as amended by Directive 2008/11/EC, Directive 2010/73/EU and Directive 2008/78/EU) and includes any relevant implementing measures in the Relevant Member State.

Prospective investors considering acquiring any Notes should understand the risks of transactions involving the Notes and should reach an investment decision only after carefully considering the suitability of the Notes in light of their particular circumstances (including without limitation their own financial circumstances and investment objectives and the impact the Notes will have on their overall investment portfolio) and the information contained in this Base Prospectus and the applicable Final Terms. Prospective investors should consider carefully the risk factors set out under "*Risk Factors*" in the Base Prospectus referred to below.

Section C – Securities		
C.1	Description of Type and Class of Securities:	Issuance in series: The Notes will be issued in series ("Series") which may comprise one or more tranches ("Tranches") issued on different issue dates. The Notes of each tranche of the same series will all be subject to identical terms, except for the issue dates and/or issue prices of the respective Tranches. The Notes are issued as Series number 344, Tranche number 1. Form of Notes: The applicable Final Terms will specify whether the relevant Notes will be issued in bearer form ("Bearer Notes"), in certificated registered form ("Registered Notes") or in uncertificated registered form (such Notes being recorded on a register as being held in uncertificated book-entry form), ("Uncertificated Registered Notes"). Registered Notes and Uncertificated Registered Notes will not be exchangeable for other forms of Notes and vice versa. The Notes are issued in uncertificated registered form. Uncertificated Registered Notes will be held in uncertificated form in accordance with the Uncertificated Securities Regulations 2001, including any modification or re-enactment thereof for the time being in force (the "Regulations"). The Uncertificated Registered Notes will be participating securities for the purposes of the Regulations. Title to the Uncertificated Registered Notes will be recorded on the relevant Operator register of corporate securities (as defined in the Regulations) and the relevant "Operator" (as such term is used in the Regulations) is CRESTCo. Limited ("CRESTCo") or any additional or alternative operator from time to time approved by the Issuer and the CREST Registrar and in accordance with the Regulations. Notes in definitive registered form will not be issued either upon issue or in exchange for Uncertificated Registered Notes. Security Identification Number(s): The following security identification number(s) will be specified in the Final Terms. ISIN Code: GB00BZ04MY47 Common Code: BZ04MY4 SEDOL: Not Applicable

C.8	The Rights Attaching to the Securities, including Ranking and Limitations to those Rights:	Status: The Notes are unsecured. The Notes will constitute direct, unconditional, unsubordinated unsecured obligations of the Issuer that will rank <i>pari passu</i> among themselves and (save for certain obligations required to be preferred by law) equally with all other unsecured obligations (other than subordinated obligations, if any) of the Issuer from time to time outstanding. Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlying or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes. The Notes are unsecured obligations. They are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme. Denomination: The Notes will be issued in denominations of GBP 1.00. Taxation: All payments in respect of the Notes will be made without deduction for or on account of withholding taxes imposed by the United Kingdom unless such withholding or deduction is required by law. Interest: The Notes are interest bearing. Index Linked Notes - Underlying Linked Interest: Series 344 are Phoenix Kick out Notes with Capital at Risk which pay an interest amount periodically throughout the life of the Notes provided that the performance of the worst performing index in the basket comprising the Underlying (as further described in C.15 (<i>Effect of the value of the underlying instruments</i>)) meets the relevant condition (i.e. that the level of the worst performing index in the basket comprising the Underlying is greater than a specified "Interest Amount Level" at the end of the relevant interest period). The interest amount ("Interest Amount") payable on each Interest Payment Date in respect of which such condition is met is 2.10 per cent. Payments of Principal: Payments of principal in respect of Notes will be calculated by reference to an index (the "Underlying" as further described in C.15 (<i>Effect of the value of the underlying instruments</i>)). C.10	Derivative Components relating to the coupon:	The Notes will provide that interest will become payable in respect of each specified period at the end of which the level of the worst performing index in the basket comprising the Underlying is greater than a specified percentage of the initial level. The interest in respect of each specified period is determined independently and paid to the investor on the related interest payment date.														
C.11	Listing and Trading:	This document has been approved by the FCA as a base prospectus in compliance with the Prospectus Directive and relevant implementing measures in the United Kingdom for the purpose of giving information with regard to the Notes issued under the Programme described in this Base Prospectus during the period of twelve months after the date hereof. Application has also been made for the Notes to be admitted during the twelve months after the date hereof to listing on the Official List of the FCA and to trading on the regulated market (for the purposes of EU Directive 2004/39/EC (the Markets in Financial Instruments Directive)) (the "Regulated Market") Regulated Market of the London Stock Exchange plc (the "London Stock Exchange"). C.15	Effect of value of underlying instruments:	The return on the Notes is linked to the performance of an underlying instrument (being the basket of indices specified below) (the "Underlying"). The value of the worst performing index in the basket comprising the Underlying is used to calculate the redemption price of the Notes and accordingly affects the return (if any) on the Notes: <table><tr><th>Index</th><th>Weighting</th></tr><tr><td>Euro STOXX® 50</td><td>Not Applicable</td></tr><tr><td>FTSE™ 100</td><td>Not Applicable</td></tr></table> If the arithmetic average of the performance of the Underlying during the averaging period (the "Automatic Early Redemption Averaging Period") specified below, is greater than the level specified (the "Automatic Early Redemption Threshold"), the Notes will be redeemed at the relevant amount specified below (the "Automatic Early Redemption Amount") on the applicable date prior to maturity (the "Automatic Early Redemption Date"): <table><tr><th>Automatic Early Redemption Valuation Date</th><th>Automatic Early Redemption Date</th><th>Automatic Early Redemption Amount</th><th>Automatic Early Redemption Threshold</th></tr><tr><td>17 July 2019</td><td>The date which is 2 Business Days immediately following the relevant Automatic Early Redemption Valuation Date</td><td>100 per cent. of Issue Price</td><td>105 per cent. of Initial Index Level</td></tr></table>	Index	Weighting	Euro STOXX® 50	Not Applicable	FTSE™ 100	Not Applicable	Automatic Early Redemption Valuation Date	Automatic Early Redemption Date	Automatic Early Redemption Amount	Automatic Early Redemption Threshold	17 July 2019	The date which is 2 Business Days immediately following the relevant Automatic Early Redemption Valuation Date	100 per cent. of Issue Price	105 per cent. of Initial Index Level

		The market price or value of the Notes at any times is expected to be affected by changes in the value of the Underlying.	
C.16	Expiration or maturity date:	The Maturity Date of the Notes is 17 July 2023.	
C.17	Settlement procedure:	The Notes will be cash-settled.	
C.18	Return on securities:	Series 344 are Phoenix Kick Out Notes with Capital at Risk, the return on which are linked to the Underlying. Interest Amounts payable on the Notes The Notes pay interest in an amount linked to the performance of the worst performing index in the basket comprising the Underlying. Redemption Amount payable on the Notes The calculations which are required to be made to calculate the amounts payable in relation to each type of Note will be based on the level, price or value (as applicable) of the relevant Underlying at certain specified times, where the "level" is in respect of an index, a basket of indices, or an inflation index, "price" is in respect of a share or "value" is in respect of a basket of shares. The Notes are Index Linked Notes, the redemption amount in respect of which is linked to the worst performing index in the basket comprising the Underlying. Capital at Risk	

		The Notes have capital at risk. Phoenix Kick Out Notes with Capital at Risk: An interest payment (an "Interest Amount") will become payable in respect of each specified period at the end of which the level of the worst performing index in the basket comprising the Underlying is greater than a specified percentage of the initial level of such index (the "Interest Amount Level"). The Interest Amount in respect of each specified period is determined independently and paid to the investor on the related interest payment date. If there has been no kick out, the return on the Notes at maturity will be based on the final level of the Underlying (calculated as described in C.19 (<i>Exercise price or final reference price of the underlying</i>)), and in certain circumstances this may result in the investor receiving an amount less than their initial investment. <i>Scenario A – Digital Return</i> If at maturity the level of the worst performing index in the basket comprising the Underlying is greater than or equal to a specified percentage of the initial level of such index, an investor will receive a cash amount equal to their initial investment multiplied by a specified percentage return of at least 100% ("Digital Return"). <i>Scenario B – No Return</i> Not Applicable as no "Barrier Condition" has been specified in relation to the Notes. <i>Scenario C – Loss of Investment</i> If at maturity the level of the worst performing index in the basket comprising the Underlying is less than a specified percentage of the initial level of such index, an investor will receive a cash amount equal to their initial investment reduced by an amount linked to the decline in performance of the worst performing index in the basket comprising the Underlying (the "downside"); this downside performance may be subject to gearing (i.e. a percentage by which any change in the level of such index is multiplied).
C.19	Exercise price or final reference price of the underlying:	The determination of the performance of Underlying will be carried out by the Calculation Agent, being Investec Bank plc as at the Valuation Time. The initial level of each index in the basket comprising the Underlying will be the closing level on the Issue Date. The final level of each index in the basket comprising the Underlying will be the arithmetic average of the official closing level of such index as at the Valuation Time on each on each scheduled trading day in the period from and including the final averaging start date to and including the final averaging end date. The level of the Underlying used to determine whether or not an automatic early redemption is applicable will be the arithmetic average of the closing level of the worst performing index in the basket comprising the

		Underlying on the automatic early redemption averaging end date and the four scheduled trading days prior to the automatic early redemption averaging end date. The determination of the redemption amount of the Notes will be carried out by the Calculation Agent, being Investec Bank plc.		
C.20	Type of the underlying:	The Underlying relating to the Notes is a basket of indices, details of which are set out in the following table, including information about where further information can be obtained about the past and further performance of the Underlying.

Section D – Risks		
D.2	Risks specific to the issuer:	In relation to Public Offers of the Notes, the Notes are designed for investors who are or have access to a suitably qualified independent financial adviser or who have engaged a suitably qualified discretionary investment manager, in order to understand the characteristics and risks associated with structured financial products. The following are the key risks applicable to the Issuer: <i>Market risks, business and general macro-economic conditions and fluctuations as well as volatility in the global financial markets could adversely affect the Issuer's business in many ways.</i> The Issuer is subject to risks arising from general macro-economic conditions in the countries in which it operates, including in particular the UK, Europe, Asia and Australia, as well as global economic conditions. <i>The Issuer is subject to risks concerning customer and counterparty credit quality.</i> Credit and counterparty risk is defined as the risk arising from an obligor's (typically a client's or counterparty's) failure to meet the terms of any agreement. Credit and counterparty risk arises when funds are extended, committed, invested, or otherwise exposed through contractual agreements, whether reflected on- or off-balance sheet. The Issuer's credit risk arises primarily in relation to its Specialist Banking business, through which it offers products such as private client mortgages and specialised lending to high income professionals and high net worth individuals and a range of lending products to corporate clients, including corporate loans, asset based lending, fund finance, asset finance, acquisition finance, power and infrastructure finance, resource finance and corporate debt securities. Within its Wealth & Investment business, the Issuer is subject to relatively limited settlement risk which can arise due to undertaking transactions in an agency capacity on behalf of clients. In accordance with policies overseen by its Central Credit Management department, the Issuer makes provision for specific impairments and calculates the appropriate level of portfolio impairments in relation to the credit and counterparty risk to which it is subject. Increased credit and counterparty risk could have a material adverse impact on the Issuer's business, results of operations, financial condition and prospects. <i>The Issuer is subject to liquidity risk, which may impair its ability to fund its operations.</i> Liquidity risk is the risk that the Issuer has insufficient capacity to fund increases in its assets, or that it is unable to meet its payment obligations as they fall due, without incurring unacceptable losses. This includes repaying depositors and repayments of wholesale debt. This risk is inherent in all banking operations and can be impacted by a range of institution-specific and market-wide events.

		<i>The Issuer may have insufficient capital in the future and may be unable to secure additional financing when it is required.</i> The prudential regulatory capital and liquidity requirements applicable to banks have increased significantly over the last decade, largely in response to the financial crisis that commenced in 2008 but also as a result of continuing work undertaken by regulatory bodies in the financial sector subject to certain global and national mandates. These prudential requirements are likely to increase further in the short term, not least in connection with ongoing implementation issues, and it is possible that further regulatory changes may be implemented in this area in any event. If the Issuer fails to meet its minimum regulatory capital or liquidity requirements, it may be subject to administrative actions or sanctions. In addition, a shortage of capital or liquidity could affect the Issuer's ability to pay liabilities as they fall due, pay future dividends and distributions, and could affect the implementation of its business strategy, impacting future growth potential.
D.3	Risks specific to the securities:	Series 344 are Phoenix Kick Out Notes with Capital at Risk, the return on which are linked to the worst performing of the indices in the basket comprising the Underlying. The following are the key risks applicable to the Notes: Capital at Risk: Phoenix Kick out Notes with Capital at Risk are not capital protected. The value of the Notes issuable under the Programme prior to maturity depends on a number of factors including the performance of the worst performing index in the basket comprising the applicable Underlying. A deterioration in the performance of the worst performing index in the basket comprising the Underlying may result in a total or partial loss of the investor's investment in the Notes. As such Notes are not capital protected, there is no guarantee that the return on such a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. As a result of the performance of the relevant Underlying, an investor may lose all of their initial investment. Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in Notes which are not capital protected may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment. Unsecured Notes: Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlying or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes. Investment Products: The Notes are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit

protection insurance scheme.

Return linked to performance of the relevant Underlying: The return on the Notes is calculated by reference to the performance of the worst performing index in the basket comprising the Underlying. Poor performance of the relevant index could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.

Downside risk: Since the Notes are not capital protected, if at maturity the level of the worst performing index in the basket comprising the Underlying is less than a specified level, investors may lose their right to return of all their principal and may suffer a reduction of their capital in proportion (or a proportion multiplied by a leverage factor) with the decline of the level of the worst performing index in the basket comprising the Underlying, in which case investors would be fully exposed to any downside of the worst performing index in the basket comprising the Underlying during such specified period.

Interest linked to Underlying: The return interest payable on Phoenix Kick Out Notes with Capital at Risk, Range Accrual Notes (Income) with Capital at Risk, Range Accrual Notes (Income) without Capital at Risk, N Barrier Notes (Income) with Capital at Risk, Inflation Linked Notes without Capital at Risk, Inflation (Interest only) Linked Notes without Capital at Risk and Inflation Linked Notes with Capital at Risk will be dependent on the level of the worst performing index in the basket comprising the Underlying during the applicable interest period or at the end of the interest period. Noteholders will be exposed to the risk of a prolonged increase or decline in, or volatility of, the worst performing index in the basket comprising the Underlying that causes a negative performance in the Underlying, or causes the level of the worst performing index in the basket comprising the Underlying to fall outside of the specified range or below the specified level, and this could result in a decrease in the interest payments on the Notes or no interest being payable in relation to the Notes.

Tax: Noteholders will be liable for and/or subject to any taxes, including withholding tax, payable in respect of the Notes.

Such determinations and calculations will determine the amounts that are required to be paid by the Issuer to holders of the Notes. Accordingly when the Issuer acts as Calculation Agent, or Valuation Agent its duties as agent (in the interest of holders of the Notes) may conflict with the interest as issuer of the Notes.
E.7	Estimated Expenses:	Not Applicable. Expenses in respect of the offer or listing of the Notes are not charged by the Issuer or Dealers to the Investor.
