Investec Bank plc
Issue of GBP Phoenix Kick Out Notes with Capital at Risk
under the
£2,000,000,000 Impala Bonds Programme

The Base Prospectus referred to below (as completed by these Final Terms) has been prepared on the basis that, except as provided in sub-paragraph (ii) below, any offer of Notes in any Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "Relevant Member State") will be made pursuant to an exemption under the Prospectus Directive, as implemented in that Relevant Member State, from the requirement to publish a prospectus for offers of the Notes. Accordingly any person making or intending to make an offer of the Notes may only do so:

- (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer; or
- (ii) in those Public Offer Jurisdictions mentioned in paragraph 8 of Part B below, provided such person is one of the persons mentioned in paragraph 8 of Part B below and that such offer is made during the Offer Period specified for such purpose therein.

Neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any offer of Notes in any other circumstances. The expression "**Prospectus Directive**" means Directive 2003/71/EC (as amended by Directive 2008/11/EC, Directive 2010/73/EU and Directive 2008/78/EU) and includes any relevant implementing measures in the Relevant Member State.

Prospective investors considering acquiring any Notes should understand the risks of transactions involving the Notes and should reach an investment decision only after carefully considering the suitability of the Notes in light of their particular circumstances (including without limitation their own financial circumstances and investment objectives and the impact the Notes will have on their overall investment portfolio) and the information contained in this Base Prospectus and the applicable Final Terms. Prospective investors should consider carefully the risk factors set out under "*Risk Factors*" in the Base Prospectus referred to below.

Section B – Issuer		
B.1	Legal and commercial name of the Issuer:	The legal name of the issuer is Investec Bank plc (the "Issuer").
B.2	Domicile and legal form of the Issuer:	<p>The Issuer is a public limited company registered in England and Wales under registration number 00489604. Excluding this deduction, the ratio would be 0.3% higher. The credit loss charge as a percentage of average gross core loans and advances has decreased from 1.16% at 31 March 2015 to 1.13%. The interest amount ("Interest Amount") payable on each Interest Payment Date in respect of which such condition is met is 1.50 per cent.</p> <p>Any "Missed Interest Amounts" (being Interest Amounts which did not become payable in respect of an interest period because the level of the Underlying was lower than the Interest Amount Level at the end of such period) will be paid out with any subsequent interest payments.</p> <p>Payments of Principal: Payments of principal in respect of Notes will be calculated by reference to an index (the "Underlying" as further described in C.15 (<i>Effect of the value of the underlying instruments</i>)).</p> <p>Deutsche Trustee Company Limited (the "Trustee") has entered into a trust deed with the Issuer in connection with the Programme, under which</p>

		<p><i>Scenario A – Digital Return</i></p> <p>If at maturity the level of the Underlying is greater than or equal to a specified percentage of the initial level of such index, an investor will receive a cash amount equal to their initial investment multiplied by a specified percentage return of at least 100% ("Digital Return").</p> <p><i>Scenario B – No Return</i></p> <p>If at maturity the level of the Underlying is less than or equal to a specified percentage of the initial level of the Underlying, an investor will receive a cash amount equal to their initial investment with no additional return, provided that the "Barrier Condition"* has been satisfied in relation to the Notes..</p> <p><i>Scenario C – Loss of Investment</i></p> <p>If at maturity the level of the Underlying is less than or equal to a specified percentage of the initial level of the Underlying and the "Barrier Condition" is not satisfied, an investor will receive a cash amount equal to their initial investment reduced by an amount linked to the decline in performance of the Underlying (the "downside"); this downside performance may be subject to gearing (i.e. a percentage by which any change in the level of the Underlying is multiplied).</p> <p><i>The "Barrier Condition" is satisfied where the level of the Underlying is greater than or equal to a specified percentage of the initial level of the Underlying on each day during the period specified in the relevant Final Terms.</i></p>

Section D – Risks		
D.2	Risks specific to the issuer:	<p>In relation to Public Offers of the Notes, the Notes are designed for investors who are or have access to a suitably qualified independent financial adviser or who have engaged a suitably qualified discretionary investment manager, in order to understand the characteristics and risks associated with structured financial products.</p> <p>The following are the key risks applicable to the Issuer:</p> <p><i>Market risks, business and general macro-economic conditions and fluctuations as well as volatility in the global financial markets could adversely affect the Issuer's business in many ways.</i></p> <p>The Issuer is subject to risks arising from general macro-economic conditions in the countries in which it operates, including in particular the UK, Europe, Asia and Australia, as well as global economic conditions.</p> <p><i>The Issuer is subject to risks concerning customer and counterparty credit quality.</i></p> <p>Credit and counterparty risk is defined as the risk arising from an obligor's (typically a client's or counterparty's) failure to meet the terms of any agreement. Credit and counterparty risk arises when funds are extended, committed, invested, or otherwise exposed through contractual agreements, whether reflected on- or off-balance sheet.</p> <p>The Issuer's credit risk arises primarily in relation to its Specialist Banking business, through which it offers products such as private client mortgages and specialised lending to high income professionals and high net worth individuals and a range of lending products to corporate clients, including corporate loans, asset based lending, fund finance, asset finance, acquisition finance, power and infrastructure finance, resource finance and corporate debt securities. Within its Wealth & Investment business, the Issuer is subject to relatively limited settlement risk which can arise due to undertaking transactions in an agency capacity on behalf of clients.</p> <p>In accordance with policies overseen by its Central Credit Management department, the Issuer makes provision for specific impairments and calculates the appropriate level of portfolio impairments in relation to the credit and counterparty risk to which it is subject.</p> <p>Increased credit and counterparty risk could have a material adverse impact on the Issuer's business, results of operations, financial condition and prospects.</p> <p><i>The Issuer is subject to liquidity risk, which may impair its ability to fund its operations.</i></p> <p>Liquidity risk is the risk that the Issuer has insufficient capacity to fund increases in its assets, or that it is unable to meet its payment obligations as they fall due, without incurring unacceptable losses. This includes repaying depositors and repayments of wholesale debt. This risk is inherent in all banking operations and can be impacted by a range of institution-specific and market-wide events.</p>

		<p><i>The Issuer may have insufficient capital in the future and may be unable to secure additional financing when it is required.</i></p> <p>The prudential regulatory capital and liquidity requirements applicable to banks have increased significantly over the last decade, largely in response to the financial crisis that commenced in 2008 but also as a result of continuing work undertaken by regulatory bodies in the financial sector subject to certain global and national mandates. These prudential requirements are likely to increase further in the short term, not least in connection with ongoing implementation issues, and it is possible that further regulatory changes may be implemented in this area in any event.</p> <p>If the Issuer fails to meet its minimum regulatory capital or liquidity requirements, it may be subject to administrative actions or sanctions. In addition, a shortage of capital or liquidity could affect the Issuer's ability to pay liabilities as they fall due, pay future dividends and distributions, and could affect the implementation of its business strategy, impacting future growth potential.</p>
D.3	Risks specific to the securities:	<p>Series 248 are Phoenix Kick Out Notes with Capital at Risk, the return on which are linked to the Underlying.</p> <p>The following are the key risks applicable to the Notes:</p> <p>Capital at Risk: Reverse Convertible Notes with Capital at Risk are not capital protected.</p> <p>The value of the Notes issuable under the Programme prior to maturity depends on a number of factors including the performance of the Underlying. A deterioration in the performance of the Underlying may result in a total or partial loss of the investor's investment in the Notes.</p> <p>As such Notes are not capital protected, there is no guarantee that the return on such a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. As a result of the performance of the relevant Underlying, an investor may lose all of their initial investment.</p> <p>Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in Notes which are not capital protected may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment.</p> <p>Unsecured Notes: Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlying or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes.</p> <p>Investment Products: The Notes are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p>

Return linked to performance of the relevant Underlying: The return on the Notes is calculated by reference to the performance of the Underlying. Poor performance of the relevant index could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.

Downside risk: Since the Notes are not capital protected, if at maturity the level of the Underlying is less than a specified level, investors may lose their right to return of all their principal and may suffer a reduction of their capital in proportion (or a proportion multiplied by a leverage factor) with the decline of the level of the Underlying, in which case investors would be fully exposed to any downside of the Underlying during such specified period.

Leverage factor: Depending on the formulae for calculating the return on the Notes specified in the Final Terms, the Notes may have a leveraged exposure to the Underlying, in that the exposure of each Note to the Underlying may be less than the nominal amount of the Note. Positive leveraged exposure results in the effect of small price movements being magnified and may lead to proportionally greater losses in the value of and return on the Notes as compared to an unleveraged exposure.

Interest linked to Underlying: The return interest payable on Phoenix Kick Out Notes with Capital at Risk, Range Accrual Notes (Income) with Capital at Risk, Range Accrual Notes (Income) without Capital at Risk, N Barrier Notes (Income) with Capital at Risk, Inflation Linked Notes without Capital at Risk, Inflation (Interest only) Linked Notes without Capital at Risk and Inflation Linked Notes with Capital at Risk will be dependent on the level of the Underlying during the applicable interest period or at the end of the interest period. Noteholders will be exposed to the risk of a prolonged increase or decline in, or volatility of, the relevant Underlying that causes a negative performance in the Underlying, or causes the level of the Underlying to fall outside of the specified range or below the specified level, and this could result in a decrease in the interest payments on the Notes or no interest being payable in relation to the Notes.

Tax: Noteholders will be liable for and/or subject to any taxes, including withholding tax, payable in respect of the Notes.
