SECTION C – SECURITIES

C.1	Description of Type and Class of Securities:	<p>Issuance in series: The Notes will be issued in series ("Series") which may comprise one or more tranches ("Tranches") issued on different issue dates. The Notes of each Tranche of the same series will all be subject to identical terms, except for the issue dates and/or issue prices of the respective Tranches.</p> <p>The Notes are issued as Series number ZCP2019-32, Tranche number 1.</p> <p>Form of Notes: The applicable Final Terms will specify whether the relevant Notes will be issued in bearer form ("Bearer Notes"), in certificated registered form ("Registered Notes") or in uncertificated registered form (such Notes being recorded on a register as being held in uncertificated book-entry form) ("Uncertificated Registered Notes"). Registered Notes and Uncertificated Registered Notes will not be exchangeable for other forms of Notes and <i>vice versa</i>.</p> <p>The Notes are issued in bearer form.</p> <p>Security Identification Number(s): The following security identification number(s) will be specified in the Final Terms.</p> <p>ISIN Code: XS2090077624</p> <p>Common Code: 209007762</p> <p>SEDOL: Not Applicable</p>
C.2	Currency of the Securities Issue:	<p>Currency: Subject to any applicable legal or regulatory restrictions, the Notes may be issued in any currency (the "Specified Currency").</p> <p>The Specified Currency of the Notes is GBP.</p>
C.5	Free Transferability:	<p>The Notes are freely transferable. However, applicable securities laws in certain jurisdictions impose restrictions on the offer and sale of the Notes and accordingly the Issuer and the dealers have agreed restrictions on the offer, sale and delivery of the Notes in the United States, the European Economic Area, Isle of Man, South Africa, Switzerland, Guernsey and Jersey, and such other restrictions as may be required in connection with the offering and sale of a particular Tranche of Notes in order to comply with relevant securities laws.</p>

C.8	<p>The Rights Attaching to the Securities, including Ranking and Limitations to those Rights:</p>	<p>Status: The Notes are unsecured. The Notes will constitute direct, unconditional, unsubordinated obligations of the Issuer that will rank <i>pari passu</i> among themselves and (save for certain obligations required to be preferred by law) equally with all other unsecured obligations (other than subordinated obligations, if any) of the Issuer from time to time outstanding.</p> <p>Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlying or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes. The Notes are unsecured obligations. They are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p> <p>Payments of Principal: Payments of principal in respect of Notes will in all cases be calculated by reference to the percentage change in value of one or more preference shares issued by Zebra Capital II Limited ("Preference Shares") in respect of the relevant series of Notes. The terms of each class of Preference Shares will be contained in the Memorandum and Articles of Association of Zebra Capital II Limited and the Preference Share confirmation relating to such class.</p> <p>The redemption price of each class of Preference Shares will be calculated by reference to an index (the "Underlying") as further described in C.15 (<i>Effect of the value of the underlying instruments</i>).</p> <p>Redemption of the Notes: The Notes cannot be redeemed prior to their stated maturity date (other than for taxation reasons, on the occurrence of a kick-out event, on account of certain events affecting the Preference Shares or following an event of default).</p> <p>Taxation: All payments in respect of the Notes will be made without deduction for or on account of withholding taxes imposed by the United Kingdom unless such withholding or deduction is required by law. In the event that any such deduction is made, the Issuer will not be required to pay any additional amounts in respect of such withholding or deduction.</p> <p>Denomination: The Notes will be issued in denominations of GBP1.00.</p> <p>Governing Law: English law</p>
C.11	<p>Listing and Trading:</p>	<p>This document has been approved by the FCA as a base prospectus in compliance with the Prospectus Directive and relevant implementing measures in the United Kingdom for the purpose of giving information with regard to the Notes issued under the Programme described in this Base Prospectus during the period of twelve months after the date hereof. Application has also been made for the Notes to be admitted during the twelve months after the date hereof to listing on the Official List of the FCA and to trading on the regulated market (for the purposes of EU Directive 2014/65/EU (MiFID II)) (the "Regulated Market") of the London Stock Exchange plc (the "London Stock Exchange").</p> <p>Application will be made for the Notes to be admitted to listing on the Official List of the FCA and to trading on the London Stock Exchange effective on or around the Issue Date.</p>

C.15 Effect of value of underlying instruments:

The performance of the Underlying will determine the redemption price and final value (on a one for one basis) of a class of preference share issued by Zebra Capital II Limited (the "Preference Share"), an exempted company incorporated under the laws of the Cayman Islands which is independent of the Issuer and whose business consists of the issuance of Preference Shares in connection with the Programme.

The percentage change in the final value of the relevant Preference Share or Preference Shares compared to its or their issue price is then used to calculate the value and return on the Notes.

As a result, the potential effect of the performance of the Underlying on the return on the Notes means that investors may lose some or all of their investment.

For the avoidance of doubt, the Notes are not backed by or secured on the Preference Shares and accordingly, only a nominal amount of the Preference Shares may be issued by Zebra Capital II Limited regardless of the principal amount of the applicable issuance of Notes by the Issuer.

In this section, for ease of explanation rather than refer to the Notes being linked to the value of the Preference Share which is in turn linked to the Underlying, the Notes (including the return on the Notes) are described as being linked to the Underlying.

The return on the Notes is linked to the performance of an underlying instrument (being the FTSE® 100 Index) (the "Underlying"). The value of the Underlying is used to calculate the redemption price of the Notes and accordingly affects the return (if any) on the Notes.

Kick Out Notes

If the arithmetic average of the performance of the Underlying during the averaging period (the "Automatic Early Redemption Averaging Period") specified below, is greater than the level specified (the "Automatic Early Redemption Threshold"), the Notes will be redeemed at the relevant amount specified below (the "Automatic Early Redemption Amount") on the applicable date prior to maturity (the "Automatic Early Redemption Date"):

		<p><i>Scenario A – Digital Return</i></p> <p>If at maturity the level of the Underlying is greater than a specified percentage of the initial level of the Underlying, an investor will receive a "Digital Return" being their initial investment multiplied by a specified percentage return.</p> <p><i>Scenario B – No Return</i></p> <p>If at maturity the level of the Underlying is less than or equal to a specified percentage of the initial level of the Underlying, an investor will receive their initial investment with no additional return, provided that a "Trigger Event"* has not occurred.</p> <p><i>Scenario C – Loss of Investment</i></p> <p>If at maturity the level of the Underlying is less than or equal to a specified percentage of the initial level of the Underlying and a Trigger Event has occurred an investor's investment will be reduced by 1% for every 1% fall of the level of the Underlying at maturity.</p> <p>*A "Trigger Event" occurs where the arithmetic average of the level of the Underlying over the averaging dates specified in the Final Terms is less than a specified percentage of the initial level of the Underlying.</p>

SECTION D – RISKS

D.2 Risks specific to the issuer:

In relation to Public Offers of the Notes, the Notes are designed for investors who are or have access to a suitably qualified independent financial adviser or who have engaged a suitably qualified discretionary investment manager, in order to understand the characteristics and risks associated with structured financial products.

The following are the key risks applicable to the Issuer:

Market risks, business and general macro-economic conditions and fluctuations as well as volatility in the global financial markets could adversely affect the Issuer's business in many ways.

The Issuer is subject to risks arising from general macro-economic conditions in the countries in which it operates, including in particular the UK, Europe, Asia and Australia, as well as global economic conditions.

The Issuer is subject to risks concerning customer and counterparty credit quality.

Credit and counterparty risk is defined as the risk arising from an obligor's (typically a client's or counterparty's) failure to meet the terms of any agreement. Credit and counterparty risk arises when funds are extended, committed, invested, or otherwise exposed through contractual agreements, whether reflected on- or off-balance sheet.

The Issuer's credit risk arises primarily in relation to its Specialist Banking business, through which it offers products such as private client mortgages and specialised lending to high income professionals and high net worth individuals and a range of lending products to corporate clients, including corporate loans, asset based lending, fund finance, asset finance, acquisition finance, power and infrastructure finance, resource finance and corporate debt securities. Within its Wealth & Investment business, the Issuer is subject to relatively limited settlement risk which can arise due to undertaking transactions in an agency capacity on behalf of clients.

In accordance with policies overseen by its Central Credit Management department, the Issuer makes provision for specific impairments and calculates the appropriate level of portfolio impairments in relation to the credit and counterparty risk to which it is subject.

Increased credit and counterparty risk could have a material adverse impact on the Issuer's business, results of operations, financial condition and prospects.

The Issuer is subject to liquidity risk, which may impair its ability to fund its operations.

Liquidity risk is the risk that the Issuer has insufficient capacity to fund increases in its assets, or that it is unable to meet its payment obligations as they fall due. This includes repaying depositors or maturing wholesale debt. This risk arises from mismatches in the timing of cash flows, and is inherent in all banking operations and can be impacted by a range of institution-specific and market-wide events.

The Issuer may have insufficient capital in the future and may be unable to secure additional financing when it is required.

The prudential regulatory capital requirements applicable to banks have increased significantly over the last decade, largely in response to the financial crisis that commenced in 2008 but also as a result of continuing work undertaken by regulatory bodies in the financial sector subject to certain global and national mandates. These prudential requirements are likely to increase further in the short term, not least in connection with ongoing implementation issues, and it is possible that further regulatory changes may be implemented in this area in any event.

If the Issuer fails to meet its minimum regulatory capital or liquidity requirements, it may be subject to administrative actions or sanctions. In addition, a shortage of capital or liquidity could affect the Issuer's ability to pay liabilities as they fall due, pay future dividends and distributions, and could affect the implementation of its business strategy, impacting future growth potential.

D.6	Risks specific to the securities:	<p>Capital at Risk: The Notes are not capital protected. Accordingly, there is no guarantee that the return on a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. Investors may lose some or all of their initial investment.</p> <p>Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in the Notes may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment.</p> <p>Unsecured Notes: Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlying or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes. The Notes are unsecured obligations. They are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p> <p>Investment Products: The Notes are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p> <p>Return linked to performance of the relevant Preference Share: The return on the Notes is calculated by reference to the percentage change in value of one or more preference shares, the redemption price on such preference shares being based on the performance of the Underlying. Poor performance of the relevant Underlying could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.</p> <p><i>In this section, for ease of explanation, the return on the Notes is summarised by reference to the performance of the Underlying rather than the applicable Preference Share.</i></p> <p>Return linked to performance of the relevant Underlying: The Return on the Notes is calculated by reference to the performance of the Underlying. Poor performance of the relevant Underlying could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.</p> <p>Downside risk: Since the Notes are not capital protected, if at maturity the level of the Underlying is less than a specified level, investors may lose their right to return of all their principal at maturity and may suffer a reduction of their capital in proportion (or a proportion multiplied by a leverage factor) with the decline of the level of the Underlying, in which case investors would be fully exposed to any downside of the Underlying during such specified period.</p>

Accordingly, when the Issuer acts as Calculation Agent, Preference Share Calculation Agent or Valuation Agent its duties as agent (in the interests of holders of the Notes) may conflict with its interests as Issuer of the Notes.</p>
E.7	Estimated Expenses:	<p>Not applicable. Expenses in respect of the offer or listing of the Notes are not charged by the Issuer or Offeror or Dealer to the investor.</p>
