C.8	The Rights Attaching to the Securities, including Ranking and Limitations to those Rights:	<p>Status: The Notes are unsecured. The Notes will constitute direct, unconditional, unsubordinated obligations of the Issuer that will rank <i>pari passu</i> among themselves and (save for certain obligations required to be preferred by law) equally with all other unsecured obligations (other than subordinated obligations, if any) of the Issuer from time to time outstanding.</p> <p>Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlying or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes. The Notes are unsecured obligations. They are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p> <p>Payments of Principal: Payments of principal in respect of Notes will in all cases be calculated by reference to the percentage change in value of one or more preference shares issued by Zebra Capital II Limited ("Preference Shares") in respect of the relevant series of Notes. The terms of each class of Preference Shares will be contained in the Memorandum and Articles of Association of Zebra Capital II Limited and the Preference Share confirmation relating to such class.</p> <p>The redemption price of each class of Preference Shares will be calculated by reference to a basket of indices (the "Underlying"), as further described in C.15 (<i>Effect of value of underlying instruments</i>).</p>
		<p>Redemption of the Notes: The Notes cannot be redeemed prior to their stated maturity date (other than for taxation reasons, on the occurrence of a kick-out event or on account of certain events affecting the Preference Shares or following an event of default).</p> <p>Taxation: All payments in respect of the Notes will be made without deduction for or on account of withholding taxes imposed by the United Kingdom unless such withholding or deduction is required by law. In the event that any such deduction is made, the Issuer will not</p>

		<p>be required to pay any additional amounts in respect of such withholding or deduction.</p> <p>Denomination: The Notes will be issued in denominations of GBP1,000.</p> <p>Governing Law: English law</p>
C.11	Listing and Trading:	<p>This document has been approved by the FCA as a base prospectus in compliance with the Prospectus Directive and relevant implementing measures in the United Kingdom for the purpose of giving information with regard to the Notes issued under the Programme described in this Base Prospectus during the period of twelve months after the date hereof. Application has also been made for the Notes to be admitted during the twelve months after the date hereof to listing on the Official List of the FCA and to trading on the regulated market (for the purposes of EU Directive 2004/39/EC (the Markets in Financial Instruments Directive)) (the "Regulated Market") of the London Stock Exchange plc (the "London Stock Exchange").</p> <p>Application will be made for the Notes to be admitted to listing on the Official List of the FCA and to trading on the London Stock Exchange effective on or around the Issue Date.</p>
C.15	Effect of value of underlying instruments:	<p>The performance of the worst performing index in the basket comprising the Underlying will determine the redemption price and final value (on a one for one basis) of a class of preference share issued by Zebra Capital II Limited (the "Preference Share"), an exempted company incorporated under the laws of the Cayman Islands which is independent of the Issuer and whose business consists of the issuance of Preference Shares in connection with the Programme.</p> <p>The percentage change in the final value of the relevant Preference Share or Preference Shares compared to its or their issue price is then used to calculate the value and return on the Notes.</p> <p>As a result, the potential effect of the performance of the worst performing index in the basket comprising the Underlying on the return on the Notes means that investors may lose some or all of their investment.</p>

For the avoidance of doubt, the Notes are not backed by or secured on the Preference Shares and accordingly, only a nominal amount of the Preference Shares may be issued by Zebra Capital II Limited regardless of the principal amount of the applicable issuance of Notes by the Issuer.

In this section, for ease of explanation rather than refer to the Notes being linked to the value of the Preference Share which is in turn linked to the worst performing index in the basket comprising the Underlying, the Notes (including the return on the Notes) are described as being linked to the worst performing index in the basket comprising the Underlying.

The return on the Notes is linked to an underlying instrument, being a basket of indices (the "**Underlying**"). The value of the worst performing index in the basket comprising the Underlying is used to calculate the redemption price of the Notes and accordingly affects the return (if any) on the Notes.

Kick Out Notes

If on one of the dates specified below (the "**Automatic Early Redemption Valuation Date**") the performance of the worst performing index in the basket comprising the Underlying is greater than the level specified (the "**Automatic Early Redemption Threshold**"), the Notes will be redeemed at the relevant amount specified below (the "**Automatic Early Redemption Amount**") on the applicable date prior to maturity (the "**Automatic Early Redemption Date**"):

		15 August 2025	The date which is 5 Business Days immediately following the relevant Automatic Early Redemption Valuation Date	156.00 per cent. of Issue Price	100 per cent. of Initial Index Level
		<p>*Provided that if the Automatic Early Redemption Valuation Date is not a Scheduled Trading Day, the immediately preceding Scheduled Trading Day shall be the Automatic Early Redemption Valuation Date.</p> <p>The market price or value of the Notes at any times is expected to be affected by changes in the value of the Preference Share and the worst performing index in the basket comprising the Underlying.</p>			
C.16	Expiration or maturity date:	The Maturity Date of the Notes is 24 August 2026.			
C.17	Settlement procedure:	The Notes will be cash-settled.			
C.18	Return on securities:	<p>Series ZCP 2018-31 are Kick Out Upside Plus Notes with Capital at Risk.</p> <p>The performance of the worst performing index in the basket comprising the Underlying will determine the redemption price of the Preference Share. This redemption price is used to calculate the final value of the Preference Share on a one for one basis. The percentage change in the final value of the Preference Share as against its issue price is then used to calculate the return on the Notes.</p> <p>As a result, the potential effect of the value of the worst performing index in the basket comprising the Underlying on the return on the Notes means that investors may lose some or all of their investment.</p>			

		<p><i>In this section, for ease of explanation rather than refer to the Notes being linked to the value of the Preference Share which is in turn linked to the worst performing index in the basket comprising the Underlying, Notes (including the return on the Notes) are described as being linked to the worst performing index in the basket comprising the Underlying.</i></p>
		<p>Redemption provisions in respect of Kick Out Upside Plus Notes with Capital at Risk:</p> <p>These Notes have the potential for early maturity (kick out) on a certain date or dates specified in the Final Terms, depending on the level of the worst performing index in the basket comprising the Underlying at that time. If the Notes kick out early an investor will receive a return of their initial investment plus a fixed percentage payment.</p> <p>If there has been no kick out, the return on the Notes at maturity will be based on the performance of the worst performing index in the basket comprising the Underlying, and in certain circumstances this may result in the investor receiving an amount less than their initial investment.</p>
		<p>The potential payouts at maturity for Kick Out Upside Plus Notes with Capital at Risk are as follows:</p> <p><i>Scenario A – Digital Return</i></p> <p>If at maturity the level of the worst performing index in the basket comprising the Underlying is greater than a specified percentage of the initial level of the worst performing index in the basket comprising the Underlying, an investor will receive a "Digital Return" being their initial investment multiplied by a specified percentage return.</p> <p><i>Scenario B – No Return</i></p> <p>If at maturity the level of the worst performing index in the basket comprising the Underlying is less than or equal to a specified percentage of the initial level of the Underlying, an investor will receive their initial investment with no additional return, provided that a "Trigger Event"* has not occurred.</p> <p><i>Scenario C – Loss of Investment</i></p> <p>If at maturity the level of the worst performing index in the basket comprising the Underlying is less than a specified percentage of the initial level of the worst performing index in the basket comprising the Underlying and a Trigger Event has occurred, an investor's investment will be reduced by an amount linked to the decline in performance (the "downside") of the worst performing index in the basket comprising the Underlying between certain specified levels (such levels being the "Upper Strike" and the "Lower Strike" respectively); this downside performance is subject to gearing (i.e. a percentage by which any change in the level of such index is multiplied).</p>
		<p>*A "Trigger Event" occurs where the level of the worst performing index in the basket comprising the Underlying falls below a specified percentage of the initial level of such index at the Valuation Time on the date specified in the Final Terms.</p>

C.19	<p>Exercise price or final reference price of the underlying:</p>	<p>The performance of the worst performing index in the basket comprising the Underlying will determine the redemption price of the Preference Share. This redemption price is used to calculate the final value of the Preference Share on a one for one basis. The percentage change in the final value of the Preference Share as against its issue price is then used to calculate the return on the Notes.</p> <p><i>In this section, for ease of explanation rather than refer to the Notes being linked to the value of the Preference Share which is in turn linked to the worst performing index in the basket comprising the Underlying, Notes (including the return on the Notes) are described as being linked to the worst performing index in the basket comprising the Underlying.</i></p> <p>The determination of the performance of the Underlying will be carried out by the Preference Share Calculation Agent, being Investec Bank plc.</p> <p>The Preference Share Calculation Agent will compare an initial level of the Underlying with a final level of the Underlying.</p> <p>The initial level of the Underlying will be the closing level on the Issue Date.</p> <p>The final level of the worst performing index in the basket comprising the Underlying will be the closing level of the worst performing index in the basket comprising the Underlying on the final redemption valuation date.</p> <p>The level of the Underlying used to determine whether or not an automatic early redemption is applicable will be the closing level of the worst performing index in the basket comprising the Underlying on the automatic early redemption valuation date.</p> <p>The determination of the redemption amount of the Notes will be carried out by the Calculation Agent, being Investec Bank plc.</p>
C.20	<p>Type of the underlying:</p>	<p>The performance of the worst performing index in the basket comprising the Underlying will determine the redemption price of the Preference Share. SECTION D – RISKS		
D.2	Risks specific to the issuer:	<p>In relation to Public Offers of the Notes, the Notes are designed for investors who are or have access to a suitably qualified independent financial adviser or who have engaged a suitably qualified discretionary investment manager, in order to understand the characteristics and risks associated with structured financial products.</p> <p>The following are the key risks applicable to the Issuer:</p> <p><i>Market risks, business and general macro-economic conditions and fluctuations as well as volatility in the global financial markets could adversely affect the Issuer's business in many ways.</i></p> <p>The Issuer is subject to risks arising from general macro-economic conditions in the countries in which it operates, including in particular the UK, Europe, Asia and Australia, as well as global economic conditions.</p> <p><i>The Issuer is subject to risks concerning customer and counterparty credit quality.</i></p> <p>Credit and counterparty risk is defined as the risk arising from an obligor's (typically a client's or counterparty's) failure to meet the terms of any agreement. Credit and counterparty risk arises when funds are extended, committed, invested, or otherwise exposed through contractual agreements, whether reflected on- or off-balance sheet.</p> <p>The Issuer's credit risk arises primarily in relation to its Specialist Banking business, through which it offers products such as private client mortgages and specialised lending to high income professionals and high net worth individuals and a range of lending products to corporate clients, including corporate loans, asset based lending, fund finance, asset finance, acquisition finance, power and infrastructure finance, resource finance and corporate debt securities. Within its Wealth & Investment business, the Issuer is subject to relatively limited settlement risk which can arise due to undertaking transactions in an agency capacity on behalf of clients.</p> <p>In accordance with policies overseen by its Central Credit Management department, the Issuer makes provision for specific impairments and calculates the appropriate level of portfolio impairments in relation to the credit and counterparty risk to which it is subject.</p> <p>Increased credit and counterparty risk could have a material adverse impact on the Issuer's business, results of operations, financial condition and prospects.</p>

		<p><i>The Issuer is subject to liquidity risk, which may impair its ability to fund its operations.</i></p> <p>Liquidity risk is the risk that the Issuer has insufficient capacity to fund increases in its assets, or that it is unable to meet its payment obligations as they fall due, without incurring unacceptable losses. This includes repaying depositors and repayments of wholesale debt. This risk is inherent in all banking operations and can be impacted by a range of institution-specific and market-wide events.</p> <p><i>The Issuer may have insufficient capital in the future and may be unable to secure additional financing when it is required.</i></p> <p>The prudential regulatory capital requirements applicable to banks have increased significantly over the last decade, largely in response to the financial crisis that commenced in 2008 but also as a result of continuing work undertaken by regulatory bodies in the financial sector subject to certain global and national mandates. These prudential requirements are likely to increase further in the short term, not least in connection with ongoing implementation issues, and it is possible that further regulatory changes may be implemented in this area in any event.</p> <p>If the Issuer fails to meet its minimum regulatory capital or liquidity requirements, it may be subject to administrative actions or sanctions. In addition, a shortage of capital or liquidity could affect the Issuer's ability to pay liabilities as they fall due, pay future dividends and distributions, and could affect the implementation of its business strategy, impacting future growth potential.</p>
D.6	Risks specific to the securities:	<p>Capital at Risk: The Notes are not capital protected. Accordingly, there is no guarantee that the return on a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. Investors may lose some or all of their initial investment.</p> <p>Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in the Notes may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment.</p> <p>Unsecured Notes: Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlying or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes. The Notes are unsecured obligations. They are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p>

	<p>Investment Products: The Notes are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p> <p>Return linked to performance of the relevant Preference Share: The return on the Notes is calculated by reference to the percentage change in value of one or more preference shares, the redemption price on such preference shares being based on the performance of the worst performing index in the basket comprising the Underlying. Poor performance of the relevant Underlying could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.</p>
	<p><i>In this section, for ease of explanation, the return on the Notes is summarised by reference to the performance of the worst performing index in the basket comprising the Underlying rather than the applicable Preference Share.</i></p> <p>Return linked to performance of the relevant Underlying: The return on the Notes is calculated by reference to the performance of the worst performing index in the basket comprising the Underlying. Poor performance of the relevant Underlying could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.</p> <p>Downside risk: Since the Notes are not capital protected, if at maturity the level of the worst performing index in the basket comprising the Underlying is less than a specified level, investors may lose their right to return of all their principal at maturity and may suffer a reduction of their capital in proportion (or a proportion multiplied by a leverage factor) with the decline of the level of the worst performing index in the basket comprising the Underlying, in which case investors would be fully exposed to any downside of the worst performing index in the basket comprising the Underlying during such specified period.</p> <p>Leverage factor (Gearing): The return on the Notes may be subject to a leverage factor of less than 100% and accordingly the investors may receive a lower Upside Return than they would have done had the Notes not been subject to Gearing. Conversely, if the Notes are subject to a leverage factor of more than 100%, a small downward movement in the final level of the worst performing index in the basket comprising the Underlying could result in investors suffering significant losses.</p>

SECTION E – OFFER		
E.2b	Reasons for the Offer and Use of Proceeds:	Not applicable. The use of proceeds is to make a profit and/or hedge risks.
E.3	Terms and Conditions of the Offer:	Not applicable.
E.4	Interests Material to the Issue:	The Issuer may be the Calculation Agent responsible for making determinations and calculations in connection with the Notes and may also be the Preference Share Calculation Agent and the valuation agent in connection with the Preference Share(s). Such determinations and calculations will determine the amounts that are required to be paid by the Issuer to holders of the Notes. Accordingly, when the Issuer acts as Calculation Agent, Preference Share Calculation Agent or Valuation Agent its duties as agent (in the interests of holders of the Notes) may conflict with its interests as Issuer of the Notes.
E.7	Estimated Expenses:	Not applicable. Expenses in respect of the offer or listing of the Notes are not charged by the Issuer or Offeror or Dealer to the investor.
