The terms of each class of Preference Shares will be contained in the Memorandum and Articles of Association of Zebra Capital II Limited and the Preference Share confirmation relating to such class.</p> <p>The redemption price of each class of Preference Shares will be calculated by reference to a "Risk Underlying" being an index and a "Return Underlying" being an index (the Risk Underlying and the Return Underlying together constituting the "Underlyings" as further described in C.15 (<i>Effect of the value of the underlying instruments</i>)).</p> <p><b>Redemption of the Notes:</b> The Notes cannot be redeemed prior to their stated maturity date (other than for taxation reasons, on account of certain events affecting the Preference Shares or following an event of default).</p> <p><b>Taxation:</b> All payments in respect of the Notes will be made without deduction for or on account of withholding taxes imposed by the United Kingdom unless such withholding or deduction is required by law. C.11	<b>Listing and Trading:</b>	<p>This document has been approved by the FCA as a base prospectus in compliance with the Prospectus Directive and relevant implementing measures in the United Kingdom for the purpose of giving information with regard to the Notes issued under the Programme described in this Base Prospectus during the period of twelve months after the date hereof. Application has also been made for the Notes to be admitted during the twelve months after the date hereof to listing on the Official List of the FCA and to trading on the regulated market (for the purposes of EU Directive 2004/39/EC (the Markets in Financial Instruments Directive)) (the "Regulated Market") of the London Stock Exchange plc (the "London Stock Exchange").</p> <p>Application will be made for the Notes to be admitted to listing on the Official List of the FCA and to trading on the London Stock Exchange effective on or around the Issue Date.</p>
C.15	<b>Effect of value of underlying instruments:</b>	<p>The performance of the Underlyings will determine the redemption price and final value (on a one for one basis) of a class of preference share issued by Zebra Capital II Limited (the "Preference Share"), a special purpose vehicle incorporated under the laws of the Cayman Islands which is independent of the Issuer and whose business consists of the issuance of Preference Shares in connection with the Programme.</p> <p>The percentage change in the final value of the relevant Preference Share or Preference Shares compared to its or their issue price is then used to calculate the value and return on the Notes.</p> <p><b>As a result, the potential effect of the performance of the Underlyings on the return on the Notes means that investors may lose some or all of their investment.</b></p>
		<p>For the avoidance of doubt, the Notes are not backed by or secured on the Preference Shares and accordingly, only a nominal amount of the Preference Shares may be issued by Zebra Capital II Limited regardless of the principal amount of the applicable issuance</p>

The value of the Underlyings is used to calculate the redemption price of the Notes and accordingly affects the return (if any) on the Notes.</p> <p>The market price or value of the Notes at any time is expected to be affected by changes in the value of the Preference Share and the Underlyings.</p>

		<p>The Preference Share Calculation Agent will compare an initial level of each Underlying with a final level of each Underlying.</p> <p>The initial level of each Underlying will be the closing level as at the Valuation Time on the Issue Date.</p>		
		<p>The final level of the Risk Underlying will be the closing level as at the Valuation Time on the final redemption valuation date.</p> <p>The final level of the Return Underlying will be the arithmetic average of the closing level as at the Valuation Time on each Scheduled Trading Day in the period from and including a final averaging start date to and including the final averaging end date.</p> <p>The determination of the redemption amount of the Notes will be carried out by the Calculation Agent, being Investec Bank Plc.</p>

**SECTION D – RISKS**

<p><b>D.2</b></p>	<p><b>Risks specific to the issuer:</b></p>	<p>In relation to Public Offers of the Notes, the Notes are designed for investors who are or have access to a suitably qualified independent financial adviser or who have engaged a suitably qualified discretionary investment manager, in order to understand the characteristics and risks associated with structured financial products.</p> <p><b>The following are the key risks applicable to the Issuer:</b></p> <p><i>The Issuer is subject to risks concerning customer and counterparty credit quality.</i></p> <p>Credit and counterparty risk is defined as the risk arising from an obligor's (typically a client's or counterparty's) failure to meet the terms of any agreement. Credit and counterparty risk arises when funds are extended, committed, invested, or otherwise exposed through contractual agreements, whether reflected on- or off-balance sheet.</p> <p>The Issuer's credit risk arises primarily in relation to its Specialist Banking business, through which it offers products such as private client mortgages and specialised lending to high income professionals and high net worth individuals and a range of lending products to corporate clients, including corporate loans, asset based lending, fund finance, asset finance, acquisition finance, power and infrastructure finance, resource finance and corporate debt securities. Within its Wealth &amp; Investment business, the Issuer is subject to relatively limited settlement risk which can arise due to undertaking transactions in an agency capacity on behalf of clients.</p> <p>In accordance with policies overseen by its Central Credit Management department, the Issuer makes provision for specific impairments and calculates the appropriate level of portfolio impairments in relation to the credit and counterparty risk to which it is subject.</p> <p>Increased credit and counterparty risk could have a material adverse impact on the Issuer's business, results of operations, financial condition and prospects.</p> <p><i>The Issuer is subject to liquidity risk, which may impair its ability to fund its operations.</i></p> <p>Liquidity risk is the risk that the Issuer has insufficient capacity to fund increases in its assets, or that it is unable to meet its payment obligations as they fall due, without incurring unacceptable losses. This includes repaying depositors and repayments of wholesale debt. This risk is inherent in all banking operations and can be impacted by a range of institution-specific and market-wide events.</p>
		<p><i>The Issuer may have insufficient capital in the future and may be unable to secure additional financing when it is required.</i></p> <p>The prudential regulatory capital and liquidity requirements applicable to banks have increased significantly over the last decade, largely in response to the financial crisis that commenced in 2008 but also as a result of continuing work undertaken by regulatory bodies in the financial sector subject to certain global and national mandates. These prudential requirements are likely to increase further in the short term, not least in connection with ongoing implementation issues, and it is possible that further regulatory changes may be implemented in this area in any event.</p> <p>If the Issuer fails to meet its minimum regulatory capital or liquidity requirements, it may be subject to administrative actions or sanctions. In addition, a shortage of capital or liquidity could affect the Issuer's ability to pay liabilities as they fall due, pay future dividends and distributions, and could affect the implementation of its business strategy, impacting future growth potential.</p>

D.6	Risks specific to the securities:	<p><b>Capital at Risk:</b> The Notes are not capital protected. Accordingly, there is no guarantee that the return on a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. Investors may lose some or all of their initial investment.</p> <p>Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in the Notes may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment.</p> <p><b>Unsecured Notes:</b> Investors investing in unsecured Notes are advised to carefully evaluate the Issuer's credit risk when considering an investment in such Notes. If the Issuer became unable to pay amounts owed to the investor under the unsecured Notes, such investor does not have recourse to the underlyings or any other security/collateral and, in a worst case scenario, investors may not receive any payments under the Notes.</p> <p><b>Investment Products:</b> The Notes are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme</p> <p><b>Return linked to performance of the relevant Preference Share:</b> The return on the Notes is calculated by reference to the percentage change in value of one or more preference shares, the redemption price on such preference shares being based on the performance of the Underlyings. Poor performance of the Underlyings could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.</p>
		<p><i>In this section, for ease of explanation, the return on the Notes is summarised by reference to the performance of the Underlyings rather than the applicable Preference Share.</i></p> <p><b>Return linked to performance of the relevant Underlying:</b> The return on the Notes is calculated by reference to the performance of the Underlyings. Poor performance of the Underlyings could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.</p> <p><b>Downside risk:</b> Since the Notes are not capital protected, if at maturity the level of the Risk Underlying is less than or equal to a specified level, investors may lose their right to return of all their principal at maturity and may suffer a reduction of their capital in proportion (or a proportion multiplied by a leverage factor) with the decline of the level of the Risk Underlying, in which case investors would be fully exposed to any downside of the Risk Underlying during such specified period.</p>

SECTION E – OFFER		
E.2b	Reasons for the Offer and Use of Proceeds:	Not Applicable. The use of proceeds is to make a profit and/or hedge risks.

<b>E.3</b>	<b>Terms and Conditions of the Offer:</b>	Not Applicable. The Notes will not be publicly offered.
<b>E.4</b>	<b>Interests Material to the Issue:</b>	The Issuer may be the Calculation Agent responsible for making determinations and calculations in connection with the Notes and may also be the Preference Share Calculation Agent and the valuation agent in connection with the Preference Share(s). Such determinations and calculations will determine the amounts that are required to be paid by the Issuer to holders of the Notes. Accordingly, when the Issuer acts as Calculation Agent, Preference Share Calculation Agent or Valuation Agent its duties as agent (in the interests of holders of the Notes) may conflict with its interests as Issuer of the Notes.
<b>E.7</b>	<b>Estimated Expenses:</b>	Not applicable. Expenses in respect of the offer or listing of the Notes are not charged by the Issuer or Offeror or Dealer to the investor.
