Investec Bank plc
Issue of GBP Kick Out Notes with Capital at Risk
under the
£2,000,000,000 Impala Bonds Programme

The Base Prospectus referred to below (as completed by these Final Terms) has been prepared on the basis that, except as provided in sub-paragraph (ii) below, any offer of Notes in any Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "**Relevant Member State**") will be made pursuant to an exemption under the Prospectus Directive, as implemented in that Relevant Member State, from the requirement to publish a prospectus for offers of the Notes. Accordingly any person making or intending to make an offer of the Notes may only do so:

- (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer; or
- (ii) in those Public Offer Jurisdictions mentioned in paragraph 8 of Part B below, provided such person is one of the persons mentioned in paragraph 8 of Part B below and that such offer is made during the Offer Period specified for such purpose therein.

Neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any offer of Notes in any other circumstances. The expression "**Prospectus Directive**" means Directive 2003/71/EC (as amended by Directive 2008/11/EC, Directive 2010/73/EU and Directive 2008/78/EU) and includes any relevant implementing measures in the Relevant Member State.

Prospective investors considering acquiring any Notes should understand the risks of transactions involving the Notes and should reach an investment decision only after carefully considering the suitability of the Notes in light of their particular circumstances (including without limitation their own financial circumstances and investment objectives and the impact the Notes will have on their overall investment portfolio) and the information contained in this Base Prospectus and the applicable Final Terms. Prospective investors should consider carefully the risk factors set out under "*Risk Factors*" in the Base Prospectus referred to below.

Section B – Issuer		
B.1	Legal and commercial name of the Issuer:	The legal name of the issuer is Investec Bank plc (the "Issuer").
B.2	Domicile and legal form of the Issuer:	<p>The Issuer is a public limited company registered in England and Wales under registration number 00489604. The liability of its members is limited.</p> <p>The Issuer was incorporated as a private limited company with limited liability on 20 December 1950 under the Companies Act 1948 and registered in England and Wales under registered number 00489604 with the name Edward Bates & Sons Limited. Since then it has undergone changes of name, eventually re-registering under the Companies Act 1985 on 23 January 2009 as a public limited company and is now incorporated under the name Investec Bank plc.</p> <p>The Issuer is subject to primary and secondary legislation relating to financial services and banking regulation in the United Kingdom, including, <i>inter alia</i>, the Financial Services and Markets Act 2000, for the purposes of which the Issuer is an authorised person carrying on the business of financial services provision. In addition, as a public limited company, the Issuer is subject to the UK Companies Act 2006.</p>

The balance sheet remains strong, supported by sound capital and liquidity ratios. At 30 September 2016, the Issuer had £6.1 billion of cash and near cash to support its activities, representing 49% of its customer deposits. Excluding this deduction, the ratio would be 0.31% higher. The credit loss charge as a percentage of average gross core loans and advances has decreased from 1.13% at 31 March 2016 to 0.74%. Section D – Risks		
D.2	Risks specific to the issuer:	<p>In relation to Public Offers of the Notes, the Notes are designed for investors who are or have access to a suitably qualified independent financial adviser or who have engaged a suitably qualified discretionary investment manager, in order to understand the characteristics and risks associated with structured financial products.</p> <p>The following are the key risks applicable to the Issuer:</p> <p><i>Market risks, business and general macro-economic conditions and fluctuations as well as volatility in the global financial markets could adversely affect the Issuer's business in many ways.</i></p> <p>The Issuer is subject to risks arising from general macro-economic conditions in the countries in which it operates, including in particular the UK, Europe, Asia and Australia, as well as global economic conditions.</p> <p><i>The Issuer is subject to risks concerning customer and counterparty credit quality.</i></p> <p>Credit and counterparty risk is defined as the risk arising from an obligor's (typically a client's or counterparty's) failure to meet the terms of any agreement. Credit and counterparty risk arises when funds are extended, committed, invested, or otherwise exposed through contractual agreements, whether reflected on- or off-balance sheet.</p> <p>The Issuer's credit risk arises primarily in relation to its Specialist Banking business, through which it offers products such as private client mortgages and specialised lending to high income professionals and high net worth individuals and a range of lending products to corporate clients, including corporate loans, asset based lending, fund finance, asset finance, acquisition finance, power and infrastructure finance, resource finance and corporate debt securities. Within its Wealth & Investment business, the Issuer is subject to relatively limited settlement risk which can arise due to undertaking transactions in an agency capacity on behalf of clients.</p> <p>In accordance with policies overseen by its Central Credit Management department, the Issuer makes provision for specific impairments and calculates the appropriate level of portfolio impairments in relation to the credit and counterparty risk to which it is subject.</p> <p>Increased credit and counterparty risk could have a material adverse impact on the Issuer's business, results of operations, financial condition and prospects.</p> <p><i>The Issuer is subject to liquidity risk, which may impair its ability to fund its operations.</i></p> <p>Liquidity risk is the risk that the Issuer has insufficient capacity to fund increases in its assets, or that it is unable to meet its payment obligations as they fall due, without incurring unacceptable losses. This includes repaying depositors and repayments of wholesale debt. This risk is inherent in all banking operations and can be impacted by a range of institution-specific and market-wide events.</p>

		<p><i>The Issuer may have insufficient capital in the future and may be unable to secure additional financing when it is required.</i></p> <p>The prudential regulatory capital and liquidity requirements applicable to banks have increased significantly over the last decade, largely in response to the financial crisis that commenced in 2008 but also as a result of continuing work undertaken by regulatory bodies in the financial sector subject to certain global and national mandates. These prudential requirements are likely to increase further in the short term, not least in connection with ongoing implementation issues, and it is possible that further regulatory changes may be implemented in this area in any event.</p> <p>If the Issuer fails to meet its minimum regulatory capital or liquidity requirements, it may be subject to administrative actions or sanctions. In addition, a shortage of capital or liquidity could affect the Issuer's ability to pay liabilities as they fall due, pay future dividends and distributions, and could affect the implementation of its business strategy, impacting future growth potential.</p>
D.3	Risks specific to the securities:	<p>Series 305S are Kick Out Notes with Capital at Risk, the return on which are linked to the worst performing index in the basket comprising the Underlying.</p> <p>The following are the key risks applicable to the Notes:</p> <p>Capital at Risk: Kick Out Notes with Capital at Risk are not capital protected.</p> <p>The value of the Notes issuable under the Programme prior to maturity depends on a number of factors including the performance of the worst performing index in the basket comprising the applicable Underlying. A deterioration in the performance of the worst performing index in the basket comprising the Underlying may result in a total or partial loss of the investor's investment in the Notes.</p> <p>As such Notes are not capital protected, there is no guarantee that the return on such a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. As a result of the performance of the Underlying, an investor may lose all of their initial investment.</p> <p>Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in Notes which are not capital protected may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment.</p> <p>Investment Products: The Notes are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any deposit protection insurance scheme.</p> <p>Return linked to performance of the relevant Underlying: The return on the Notes is calculated by reference to the performance of the worst performing index in the basket comprising the Underlying. Poor performance of the relevant index could result in investors, at best, forgoing returns that could have been made had they invested in a</p>

different product or, at worst, losing some or all of their initial investment.

Downside risk: Since the Notes are not capital protected, if at maturity the level of the worst performing index in the basket comprising the Underlying is less than a specified level, investors may lose their right to return of all their principal and may suffer a reduction of their capital in proportion (or a proportion multiplied by a leverage factor) with the decline of the level of the worst performing index in the basket comprising the Underlying, in which case investors would be fully exposed to any downside of the worst performing index in the basket comprising the Underlying during such specified period.

Leverage factor: Depending on the formulae for calculating the return on the Notes specified in the Final Terms, the Notes may have a leveraged exposure to the Underlying, in that the exposure of each Note to the Underlying may be less than the nominal amount of the Note. Positive leveraged exposure results in the effect of small price movements being magnified and may lead to proportionally greater losses in the value of and return on the Notes as compared to an unleveraged exposure.

Tax: Noteholders will be liable for and/or subject to any taxes, including withholding tax, payable in respect of the Notes.

Key risks specific to Secured Notes

Security may not be sufficient to meet all payments: Any net proceeds realised upon enforcement of any security granted by the Issuer over a pool of collateral ("**Collateral Pool**") will be applied in or towards satisfaction of the claims of, among others, the security trustee and any appointee and/or receiver appointed by the trustee in respect of the Secured Notes before the claims of the holders of the relevant Secured Notes. Since the net enforcement proceeds may not be sufficient to meet all payments in respect of the Secured Notes, investors may suffer a loss on their investment.

Collateral Pool may secure more than one series of secured Notes: A Collateral Pool may secure the Issuer's obligations with respect to more than one series of Secured Notes and an event of default under the Notes with respect to any one series of Secured Notes secured by such Collateral Pool may trigger the early redemption of all other series that are secured by the same Collateral Pool in order for the security over the entire Collateral Pool to be enforced. Such cross-default may, among other things, result in losses being incurred by holders of the Secured Notes which would not otherwise have arisen.

Substitution of Posted Collateral: Collateral posted as security for the Issuer's obligations under the Notes may, at the Issuer's request, be substituted for other items of collateral "**Eligible Collateral**" provided that on the date of transfer the value of the new collateral is equal to or exceeds the value of the original collateral. Any such substitution request is subject to (a) verification by the entity appointed as the verification agent (the "**Verification Agent**") that the new item of collateral is Eligible Collateral; and (b) approval by the Trustee. However, neither the Verification Agent nor the Trustee is obliged to confirm that the value of the new item of Eligible Collateral is equal to or exceeds the value of the original item of posted collateral. Following any such substitution, the market value of the new item of Eligible Collateral may fall below the value

of the original item of posted collateral, and the net proceeds realised upon enforcement of the relevant Collateral Pool may therefore be less than if no such substitution had been made.

Key risks specific to Credit Linked Notes

Credit Linkage: The Notes are linked to the credit of Aviva plc, Barclays Bank plc, Prudential plc, HSBC Bank plc and Lloyds Bank plc (the "Reference Entities") (the "Credit Linked Notes"). If a Reference Entity becomes subject to a Credit Event then the redemption price which would otherwise be payable in respect of the portion of the Note linked to such Reference Entity (the "Relevant Portion") will be reduced in accordance with the Recovery Rate. There is a risk that an investor in the Credit Linked Notes may receive considerably less than the amount paid by such investor, regardless of any positive performance in the Underlying. If such Reference Entity becomes subject to a Credit Event an investor's return on the Credit Linked Notes may be zero.

Postponement in payment of Final Redemption Amount – Simplified Credit Linkage: Each Note will be settled on its scheduled maturity date except that, if the Recovery Rate cannot be determined by the Calculation Agent by the scheduled maturity date, payment of the Final Redemption Amount in respect of such Note may be delayed and may fall after the Note's scheduled maturity date. Payment of the Final Redemption Amount may be delayed by up to 60 calendar days plus five business days.

General Recovery Rate in Credit Linked Notes – Simplified Credit Linkage: The redemption price payable on the Relevant Portion of the Notes following the occurrence of a Credit Event in respect of a Reference Entity will be determined by reference to the recovery rate for such Reference Entity, determined by reference to an auction coordinated by ISDA in respect of certain obligations of the Reference Entity or, in certain circumstances, including if such an auction is not held, a market price as determined by the Calculation Agent (the "Recovery Rate"). There is a risk that the return payable to an investor in a Credit Linked Note may be different from the return that investors would have received had they been holding a particular debt instrument issued by the relevant Reference Entity.

Such determinations and calculations will determine the amounts that are required to be paid by the Issuer to holders of the Notes. Accordingly when the Issuer acts as Calculation Agent, or Valuation Agent its duties as agent (in the interest of holders of the Notes) may conflict with the interest as issuer of the Notes.
E.7	Estimated Expenses:	Not Applicable. Expenses in respect of the offer or listing of the Notes are not charged by the Issuer or Dealers to the Investor.
