**Notes with Capital at Risk due 2021 under the**  
**£2,000,000,000 Impala Bonds Programme**

The Offering Memorandum referred to below (as completed by this Pricing Supplement) has been prepared on the basis that any offer of Notes in any Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "**Relevant Member State**") will be made pursuant to an exemption under the Prospectus Directive, as implemented in that Relevant Member State, from the requirement to publish a prospectus for offers of the Notes. Accordingly any person making or intending to make an offer in that Relevant Member State of the Notes may only do so in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer. Neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any offer of Notes in any other circumstances. The expression "**Prospectus Directive**" means Directive 2003/71/EC (as amended by Directive 2008/11/EC, Directive 2010/73/EU and Directive 2008/78/EU) and includes any relevant implementing measures in the Relevant Member State.

Prospective investors considering acquiring any Notes should understand the risks of transactions involving the Notes and should reach an investment decision only after carefully considering the suitability of the Notes in light of their particular circumstances (including without limitation their own financial circumstances and investment objectives and the impact the Notes will have on their overall investment portfolio) and the information contained in the Offering Memorandum and this Pricing Supplement. Prospective investors should consider carefully the risk factors set out under "*Risk Factors*" in the Offering Memorandum referred to below.

*In addition to the risk factors set out in the Offering Memorandum, Investors should be aware of the following in relation to the Series 589.*

In the event of a market downturn accompanied by low volatility, the strategy return will have a leveraged exposure to the Underlying. In such circumstances, if the Underlying performs negatively, an investor's exposure to such negative performance will be greater, and there is a higher risk that investors may lose some or all of their initial investment.

In the event of an increasing market accompanied by high volatility, the strategy return will have a lower exposure to the Underlying. In such circumstances, if the Underlying performs positively, an investor's exposure to such upside performance will be limited. In such circumstance investors may receive a lower return than they would otherwise have received.
