Section D – Risks		
D.2	<b>Risks specific to the issuer:</b>	<p>The following are the key risk applicable to the Issuer:</p> <p><b>The Issuer's businesses, earnings and financial condition may be affected by the instability in the global financial markets and economic crisis in the eurozone:</b> The performance of the Issuer may be influenced by the economic conditions of the countries in which it operates, particularly the UK. The outlook for the global economy is uncertain, in particular in European markets due to sovereign debt and speculation around the future of the euro. These market conditions have exerted downward pressure on asset prices and on availability and cost of credit for financial institutions and will continue to impact the credit quality of the Issuer's customers and counterparties. The Issuer may experience increased funding costs and find continued participation in certain markets more challenging. The risk of one or more countries leaving the euro may also have an impact on the Issuer's UK market. Such conditions may cause the Issuer to incur losses, experience reductions in business activity, find continued participation in certain markets more challenging, and experience increased funding costs and funding pressures, lower share prices, decreased asset values, additional write-downs and impairment charges and lower profitability.</p>

		<p>The precise nature of all the risks and uncertainties the Issuer faces as a result of current economic conditions cannot be predicted and many of these risks are outside the control of the Issuer and materialisation of such risks may adversely affect the Issuer's financial condition and results of operations.</p> <p><b>The Issuer's business performance could be affected if its capital resources and liquidity are not managed effectively:</b> The Issuer's capital and liquidity is critical to its ability to operate its businesses, to grow organically and to take advantage of strategic opportunities.</p> <p>The Issuer is required by regulators in the UK and other jurisdictions to maintain adequate capital and liquidity. Basel III, the Capital Requirements Directive IV and the Financial Services (Banking Reform) Act 2013 will impact the management methods of the Issuer in relation to liquidity and capital resources and may also increase the costs of doing business. Any onerous regulatory requirements introduced by regulators could result in inefficiencies in the Issuer's balance sheet structure which may adversely impact the Issuer's profitability and results. Any failure to maintain any increased regulatory capital requirements or to comply with any other requirements introduced by regulators could result in intervention by regulators or the imposition of sanctions, which may have a material adverse effect on the Issuer's profitability and results.</p> <p>The maintenance of adequate capital and liquidity is also necessary for the Issuer's financial flexibility in the face of any turbulence and uncertainty in the global economy. Extreme and unanticipated market circumstances, similar to those experienced in the recent global financial crisis and situations arising from a further deterioration in the Eurozone, may cause exceptional changes in the Issuer's markets, products and other businesses. Any exceptional changes that limit the Issuer's ability effectively to manage its capital resources could have a material adverse impact on the Issuer's profitability and results. If such exceptional changes persist, the Issuer may not have sufficient financing available to it on a timely basis or on terms that are favourable to it to develop or enhance its businesses or services, take advantage of business opportunities or respond to competitive pressures.</p> <p><b>The Issuer has significant exposure to third party credit risk:</b> The Issuer is exposed to the risk that if third parties which owe the Issuer money, securities or other assets become unable to perform their obligations, the Issuer's funding will be affected. The resulting risk to Investors is that Investors may suffer a loss on their investment if the Issuer is unable to perform its payment obligations under any Notes it issues.</p>
D.3	Risks specific to the securities:	<p>The Notes that may be issued under the Programme are:</p> <ol style="list-style-type: none"> <li>1. Kick Out Notes with Capital at Risk;</li> <li>2. Kick Out Notes without Capital at Risk;</li> <li>3. Phoenix Kick Out Notes with Capital at Risk;</li> <li>4. Multi Equity Phoenix Kick Out Notes with Capital at Risk;</li> <li>5. Upside Notes with Capital at Risk;</li> <li>6. Upside Notes without Capital at Risk;</li> </ol>

		<p>7. N Barrier (Income) Equity Linked/Index Linked Notes with Capital at Risk;</p> <p>8. Range Accrual (Income) Equity Linked/Index Linked Notes with Capital at Risk;</p> <p>9. Range Accrual (Income) Equity Linked/Index Linked Notes without Capital at Risk;</p> <p>10. Reverse Convertible Notes with Capital at Risk;</p> <p>11. Inflation (RPI Principal and Interest) Linked Notes without Capital at Risk;</p> <p>12. Inflation (RPI Interest only) Linked Notes without Capital at Risk; and</p> <p>13. Inflation Linked Notes with Capital at Risk.</p> <p>The return on the Notes may be linked to a share or basket of shares ("<b>Equity Linked</b>") or to an index or basket of indices ("<b>Index Linked</b>") or to a particular rate of inflation ("<b>Inflation Linked</b>"), each such index, share, basket of shares or basket of indices or rate of inflation being the "<b>Underlying</b>".</p> <p>Below is a description of the risks that may be applicable to some or all of the types of Note issuable under the Programme.</p> <p><b>The following are the key risks applicable to the Notes:</b></p> <p><b>Capital at Risk:</b> Upside Notes may not be capital protected.</p> <p>The value of the Notes issuable under the Programme prior to maturity depends on a number of factors including the performance of the applicable Underlying. A deterioration in the performance of the Underlying may result in a total or partial loss of the investor's investment in the Notes.</p> <p>As such Notes are not capital protected, there is no guarantee that the return on such a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. As a result of the performance of the relevant Underlying, an investor may lose all of their initial investment.</p> <p>Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in Notes which are not capital protected may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment.</p> <p><b>Return linked to performance of the relevant Underlying:</b> The return on the Notes is calculated by reference to the performance of the Underlying. Poor performance of the relevant Underlying could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment.</p>
--	--	--

		<p><b>Downside risk:</b> Since the Notes are not capital protected, if at maturity the level or price of the relevant Underlying is less than or equal to a specified level or price, investors may lose their right to return of all their principal at maturity and may suffer a reduction of their capital in proportion (or a proportion multiplied by a leverage factor) with the decline of the level or price of the relevant Underlying, in which case investors would be fully exposed to any downside of the relevant Underlying during such specified period.</p> <p><b>Leverage factor:</b> Depending on the formulae for calculating the return on the Notes specified in the Final Terms, the Notes may have a leveraged exposure to the Underlying, in that the exposure of each Note to the Underlying may be less than the nominal amount of the Note. Positive leveraged exposure results in the effect of small price movements being magnified and may lead to proportionally greater losses in the value of and return on the Notes as compared to an unleveraged exposure.</p> <p><b>Tax:</b> Noteholders will be liable for and/or subject to any taxes, including withholding tax, payable in respect of the Notes.</p>

Section E – Offer		
<b>E.2b</b>	<b>Reasons for the Offer and Use of Proceeds:</b>	Not applicable. The use of proceeds is to make a profit and/or hedge risks.
<b>E.3</b>	<b>Terms and Conditions of the Offer:</b>	Not applicable.
<b>E.4</b>	<b>Interests Material to the Issue:</b>	The Issuer may be the Calculation Agent responsible for making determinations and calculations in connection with the Notes and may also be the valuation agent in connection with the reference asset(s). Such determinations and calculations will determine the amounts that are required to be paid by the Issuer to holders of the Notes. Accordingly when the Issuer acts as Calculation Agent, or Valuation Agent its duties as agent (in the interest of holders of the Notes) may conflict with the interest as issuer of the Notes.
<b>E.7</b>	<b>Estimated Expenses:</b>	Not applicable. Expenses in respect of the offer or listing of the Notes are not charged by the Issuer or Dealers to the Investor.
